

Year 2025/2026 1100204 - Animal Physiology

Information about the subject

Degree: Bachelor of Science Degree in Biotechnology

Faculty: Faculty of Veterinary Medicine and Experimental Sciences

Code: 1100204 Name: Animal Physiology

Credits: 6,00 ECTS Year: 2 Semester: 2

Module: Fundamentals of Biology

Subject Matter: Animal physiology Type: Compulsory

Department: Basic and Cross-disciplinary Sciences

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

1102 Belen Frigols Garrido (Responsible Lecturer)

Ignacio Gimenez Nebot

belen.frigols@ucv.es

ignacio.gimenez@ucv.es

Year 2025/2026 1100204 - Animal Physiology

Module organization

Fundamentals of Biology

| Subject Matter | ECTS | Subject | ECTS | Year/semester |
|-------------------|-------|--------------------------|------|---------------|
| Biology | 12,00 | Cell Biology | 6,00 | 1/1 |
| | | Plant and Animal Biology | 6,00 | 1/1 |
| Animal physiology | 6,00 | Animal Physiology | 6,00 | 2/2 |
| Plant Biology | 6,00 | Plant Physiology | 6,00 | 2/1 |
| Microbiology | 6,00 | Microbiology | 6,00 | 2/1 |
| Virology | 6,00 | Virology | 6,00 | 3/2 |

Year 2025/2026 1100204 - Animal Physiology

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student has understood and assimilated the contents of the subject.
- R2 The student is able to solve problems or case studies related to the subject contents, by using different resources (bibliographic, IT, etc.)
- R3 The student is able to work in a laboratory, carrying out basic operations correctly and taking into account the corresponding safety standards. He/she understands the planning, development and purpose of the experience, and is able to contrast and validate the obtained results.
- R4 The student is able to write an intelligible and organized text on different aspects of the subject.
- R5 The student is able to present and defend his/her work adequately.
- R6 The student seeks bibliographic information from different sources and can analyze it with a critical and constructive spirit.
- R7 The student collaborates with the teacher and his/her peers throughout the learning process; he/she works in a team; treats everyone with respects, is proactive and fulfills the organization rules of the course.

Year 2025/2026 1100204 - Animal Physiology

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

| BASIC | | | Weig | ghting | 9 |
|-------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|------|--------|---|
| | | 1 | 2 | 3 | 4 |
| CB1 | Students acquire and understand knowledge in their field of study based on general secondary education but usually reaching a level that, although supported on advanced text books, also includes aspects involving state-of-the-art knowledge specific to their area. | | | X | |
| CB2 | Students are able to apply knowledge to their work in a professional way and have the competences enabling them to state and defend views and opinions as well as perform problem-solving tasks in their field of study. | | | X | |
| CB3 | Students are able to collect and interpret relevant data (generally in their field of study) and give opinions that involve reflection on relevant social, scientific or ethical issues. | | | x | |
| CB4 | Students can communicate information, ideas, problems and solutions to a specialized or non-specialized audience. | | | X | |
| CB5 | Students develop the necessary learning skills to undertake further studies with a high level of autonomy. | | | | X |

| GENERAL | Weighting |
|------------------------------------------|-----------|
| | 1 2 3 4 |
| CG01 Capacity to analyze and synthesize. | x |

| SPECIFIC | | | Weighting | | | |
|----------|---------------------------------------------------------------------------------------|---|-----------|---|---|---|
| | | 1 | 2 | | | 4 |
| CE22 | Knowing and understanding contents, principles and theories related to biotechnology. | | | , | X | |
| | related to biotechnology. | | | - | 7 | : |

Year 2025/2026 1100204 - Animal Physiology

| CE23 | Knowing how to use laboratory equipment and to carry out basic operations for each discipline including: safety measures, handling, waste disposal and activity register. | 1 | | X |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|---|-----------------------|
| CE24 | Knowing basic and instrument laboratory techniques in the different areas of biotechnology. | 1 1 1 1 1 1 | | x |
| CE25 | Knowing how to analyze and understand scientific data related to biotechnology. | 1 | X | |
| CE26 | To understand and identify the mechanisms that influence genetic inheritance | 1 | X | |
| CE30 | Solving and analyzing problems posed by biotechnology. | | X | |
| CE31 | Describing and calculating important variables of processes and experiments. | 1 1 1 1 | X | 1 1 1 1 1 |
| CE34 | Knowing main characteristics of Molecular biosciences and biotechnology communication. | | X | |

| TRANSVERSAL Weig | | | ghting | 9 |
|----------------------------------------------------------------------------------------------------------------------------|---|---|--------|----------------------|
| | 1 | 2 | 3 | 4 |
| CT02 Capacity to organize and plan. | | | x | |
| CT03 Mastering Spanish oral and written communication. | | | X | 1 1 1 1 = 1 |
| CT05 Knowing and applying Basic ITC skills related to Biotechnology. | x | | | |
| CT06 Capacity to manage information (capacity to look for and analyze information coming from different types of sources). | | X | | |
| CT07 Problem solving. | X | | | |
| CT08 Decision making | | x | | |
| CT09 Capacity to work in interdisciplinary and multidisciplinary team. | | x | | |
| CT10 Interpersonal skills. | | x | | |
| CT11 Understanding multicultural and diverse environment | x | | | |

Year 2025/2026 1100204 - Animal Physiology

| CT12 Critical and self-critical capacity. | x |
|-------------------------------------------------|---|
| CT13 Ethics. | x |
| CT14 Capacity to learn | x |
| CT15 Capacity to adapt to new situations | x |
| CT16 Capacity to produce new ideas (creativity) | x |
| CT17 Leadership abilities | x |
| CT18 Taking initiatives and enterprising spirit | x |
| CT19 Capacity to apply theoretical knowledge | x |
| CT20 Research skills | x |
| CT21 Sensitivity to environmental issues | x |

Year 2025/2026 1100204 - Animal Physiology

Assessment system for the acquisition of competencies and grading system

| Assessed learning outcomes | Granted percentage | Assessment method |
|----------------------------|-----------------------|----------------------|
| | 60,00% | Written test |
| | 10,00% | Submission of papers |
| | 30,00% | Laboratory test |

Observations

According to the general evaluation and qualification regulations, the preferred evaluation system will be by means of continuous evaluation. There will be a continuous evaluation of the theoretical and practical part of the course. After the teaching of the theoretical part of each didactic unit, there will be questionnaires in class type test, for the theoretical part, and of development for the practical part, imitating the evaluation system of both parts of the final exam of the course, and after the realization, it will be corrected in class so that all students receive feedback of their results. This subject cannot be assessed by means of a single assessment.

Each of the parts must be approved to pass the course. The minimum passing grade is 5 out of 10.

Attendance to the practicals is compulsory.

The use of tools based on artificial intelligence (AI) is subject to the teacher's criteria, who may establish specific limits or conditions depending on the training or assessment activity.

Year 2025/2026 1100204 - Animal Physiology

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

M1 Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge. M2 Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity. M3 Activities carried out in spaces with specialized equipment. M4 Supervised monographic sessions with shared participation... M5 Application of multidisciplinary knowledge. M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc. M7 Set of oral and/or written tests used in initial, formative or additive assessment of the student **M8** Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring

sessions. Work done on the university e-learning.

Year 2025/2026 1100204 - Animal Physiology

M9

Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform.

IN-CLASS LEARNING ACTIVITIES

| LEARNING OUTCOMES | HOURS | ECTS |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| R1, R2, R5, R6 | 37,40 | 1,50 |
| R2, R3, R6, R7 | 4,20 | 0,17 |
| R3 | 10,40 | 0,42 |
| R5, R6, R7 | 2,00 | 0,08 |
| R5, R6, R7 | 2,00 | 0,08 |
| R1, R2, R4, R5, R6 | 2,00 | 0,08 |

Year 2025/2026 1100204 - Animal Physiology

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

| Content block | Contents |
|--------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| 1. Introduction to animal physiology | Basics Relationship between structure and function Histology |
| 2. The cell membrane and cell excitability | Transport mechanisms Membrane potential and action potential Signal propagation |
| 3. The nervous system | General characteristics Types of nerve cells Sensory systems in general |
| 4 Physiology of movement | Muscular structure Mechanics of muscle contraction and its regulation |
| 5. Respiratory system | Introduction and general concepts Oxygen and carbon dioxide in the blood: transport Gas transfer in the air: lungs Regulation pH corporal |
| 6. Fluids and circulation. | The heart Arterial and venous system Regulation of circulation Circulatory systems |
| 7. Excretory system | Renal physiology and their excretory ducts Urinari system and excretion of nitrogen |
| 8. Food digestion and absorption | Catabolism and anabolism Nutritional needs Digestion and absorption |

Year 2025/2026 1100204 - Animal Physiology

9. Endocrine system. Hormone secretion and transport

Mainly hormones and their regulation

10. Reproduction and development.

Types of reproduction

Morphology of reproductive organs

Fertilization

Growth and development

11. PRACTICAL BLOCK PR1. Handling of laboratory animals, anatomy and histology.

PR2. Hematology: Obtaining plasma and blood serum.

Hematocrit value. Anticoagulants Blood count and leukocyte

formula

PR3 Electrocardiography

PR4. Urinalysis

PR5. Gamete Physiology

P.C 1 PRACTICAL PROBLEM RESOLUTION

P.C 2 GROUP ACTIVITY

Organization of the practical activities:

| | Content | Place | Hours |
|------|-----------------------------------------------------------------------------------------------------------------|--------------|-------|
| PR1. | Handling of laboratory animals, anatomy and histology. | Laboratory | 2,00 |
| PR2. | Hematology: Obtaining plasma and blood serum. Hematocritvalue. Anticoagulants Blood count and leukocyte formula | Laboratory | 2,00 |
| PR3. | Electrocardiography | Laboratory | 2,00 |
| PR4. | Urinalysis | Laboratory | 2,00 |
| PR5. | Gamete Physiology | Laboratory | 2,00 |
| PR6. | SOLVED PRACTICAL PROBLEM | Lecture room | 2,50 |
| PR7. | GROUP ACTIVITY | Computer | 2,50 |
| | | | |

Year 2025/2026 1100204 - Animal Physiology

Temporary organization of learning:

| Block of content | Number of sessions | Hours |
|--------------------------------------------|--------------------|-------|
| 1. Introduction to animal physiology | 2,00 | 4,00 |
| 2. The cell membrane and cell excitability | 2,00 | 4,00 |
| 3. The nervous system | 4,00 | 8,00 |
| 4 Physiology of movement | 2,00 | 4,00 |
| 5. Respiratory system | 2,00 | 4,00 |
| 6. Fluids and circulation. | 2,00 | 4,00 |
| 7. Excretory system | 2,00 | 4,00 |
| 8. Food digestion and absorption | 2,00 | 4,00 |
| 9. Endocrine system. | 2,50 | 5,00 |
| 10. Reproduction and development. | 2,00 | 4,00 |
| 11. PRACTICAL BLOCK | 7,50 | 15,00 |
