## Recommended knowledge

To enroll in the course, the student must have passed 75% ECTS from the 1st to 3rd year (a minimum of 135 ECTS). To perform the public defense, the student must have passed 90% of the other subjects of the Grade (216 ECTS).

## Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student has completed a project based on research, development or review of new basic and/or applied knowledge in any aspect of Biotechnology.
- R2 The student has learned how to compile, analyze and present scientific and/or technical data.
- R3 The student has prepared and submitted a detailed report on the work he/she did in a suitable layout.
- R4 The student has developed some skills in the selective and appropriate use of bibliographic sources, including database search tools.
- R5 The student is able to reference bibliographic sources correctly and consistently.
- R6 The student is able to present his/her work orally in a correct and clear manner and within the time agreed.
- R7 The student is able to respond to questions related to the background of the Project and its scientific context, the methodology used (either experimentally or from the analyzed scientific literature) and the presented results (either his/her own or from the analyzed scientific literature).
- R8 The student has developed a critical spirit with regard to appropriate controls, conclusions reached, the continuation of the project and possible future lines of research or development.
- R9 The student interprets and understands the data presented in a scientific-technical work, identifying the most outstanding characteristics of the work and being able to write a summary, or abstract, with a maximum length of 250-300 words.
- R10 The student applies, in a global way, the knowledge and competencies worked during the degree.

## Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting

## Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4, R5, R9, R10	50,00%	Written report on the Degree's Final Project
R1, R2, R6, R7, R8, R10	40,00%	Oral presentation
R1, R2, R10	10,00%	Participation in tutorials and seminars

### Observations

This course is not eligible for single evaluation. According to the general evaluation and qualification regulations, the preferred evaluation system will be continuous evaluation. The preparation of the final report has gradable deliveries during the semester as a measure to be prepared for the final exam.

- a The written report and oral defense will be evaluated by a committee formed by UCV lecturers .
- b The oral defense can be performed in English
- c This item will be evaluated by the UCV mentor

\*The use of artificial intelligence (AI)-based tools is subject to the discretion of the teacher, who may establish specific limits or conditions depending on the training or assessment activity.

### MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

## Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M4 Supervised monographic sessions with shared participation..
- M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.
- M7 Set of oral and/or written tests used in initial, formative or additive assessment of the student
- M9 Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform.
