Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3	40,00%	Carrying out a project.
R1, R2, R3, R4, R5	30,00%	Written / oral and / or practical tests.
R1, R2, R3, R4, R5	20,00%	Active participation.
R1, R2, R3	10,00%	Autonomous work.

Observations

- The student may keep the evaluation instruments passed during the 3 years following the first registration.
- It is necessary to obtain a 50% in the following instruments (if this criterion is not met, the student will be graded with a maximum of 4.5 in that exam):
 - Written/oral and/or practical tests
 - Completion of a project
 - Active participation
- Attendance to the practical sessions indicated in the schedule is mandatory. In case of non-attendance, the student will not be evaluated during that academic year in accordance with article 8 of the UCV exam regulations (it will appear as Not Presented).

SPECIFICATIONS TO THE EVALUATION INSTRUMENTS

Written/oral and/or practical tests

The evaluation system of the course is cumulative, so the grades obtained in the different instruments are independent and are added together.

This instrument consists of a single final test on the dates of official convocation whose evaluable contents are:

- All the theoretical contents taught in class (syllabus, teacher's explanations, classroom practices...).
- The contents of the training platform (articles, practical questionnaires and complementary documents indicated).

It is a test that includes different types of questions:

- Multiple-choice test (several answer options, penalty of 25% to 50% depending on the magnitude of the error).

- True/false (no penalty for incorrect answers)
- Matching (no penalty for incorrect answers)
- Short answer (one word, number or phrase (do not penalize incorrect)
- Development (resolution of practical proposals, cases, analysis of exercises, intervention contexts...).

Realization of a project

Project consisting in the realization of a group work and in the direction of a practical group session (the delivery date will be indicated on the platform together with the specific evaluation criteria).

Autonomous work

Work delivered individually on the contents of the subject (questionnaires and assignments on units that will be delivered on the platform and in the classroom).

Active participation

Delivery of group work and participation in the theoretical and practical dynamics of the subject.

The detailed explanation (procedure of the tasks) as well as the evaluation tools (cards or rubrics) of each section will be posted on the platform of each group at the student's disposal.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- | | |
|----|---|
| M2 | Group dynamics and activities. |
| M3 | Practical lesson. |
| M4 | Presentation of content by the teacher. |
