Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Identify and distinguish the different components of the locomotor system and the rest of the systems of the human body that participate in physical exercise.
- R2 Critically contrast the resources and sources of information (in Spanish and English) that allow knowing the composition of the human body and its movements.
- R3 Identify the correct structure of the components of the human body that allow a healthy state.
