- R2 Describe and prioritize practically the elements that constitute each of the structures (coordination, cognitive, conditional, socio-affective, and emotive-volitional) of volleyball in different ages and contexts.
- R3 Scientifically justify content related to volleyball.
- R4 Design and implement tasks, sessions, and programs for developing various capacities and skills specific to volleyball in different ages and contexts.
- R5 Apply assessment procedures and instruments to determine the level of acquisition of sports skills at different ages, oriented toward health and contexts (educational, recreational, competitive, and therapeutic).

### Observations

- This course is NOT susceptible to requesting a single evaluation according to article 10.3 of the GENERAL RULES FOR EVALUATION AND GRADING OF OFFICIAL COURSES AND UCV's OWN DEGREES.
- The student may keep the evaluation instruments passed during the 3 years following the first enrollment.
- It is necessary to obtain a 50% in all the evaluation instruments to pass the course.
- Attendance to all practical sessions indicated in the schedule is compulsory. Additionally for this subject, in case of not attending 80% of these, the student will fail the two calls of the course, having to recover them in the following enrollment.
- In case of not complying with any of these criteria, the student will be graded with a maximum of 4.5.

### SPECIFICATIONS OF THE EVALUATION INSTRUMENTS

#### Written and/or practical tests

It consists of a single final test on the dates of the official convocation. This instrument is divided into two parts:

Theoretical-practical exam of 20 multiple-choice questions, 3 options, each 2 wrong subtracts 1

correct (20%). Development questions, 4, each one counts 0.5 (20%).

### **Individual/group work/project**

Realization of an audio-visual, on defensive and offensive tactics of a team.

### **Oral tests or exposition**

The student will choose one of these two theoretical/practical expositions:

Exhibition on the improvement of a technical gesture. Presentation on a tactical situation of the game.

*The detailed explanation (procedure of the tasks) as well as the evaluation tools (cards or rubrics) of each section will be published on the platform of each group at the disposal of the student.*

## Use of Artificial Intelligence Tools in the CAFD Degree Program

Use of Artificial Intelligence tools in the CAFD degree program In the Bachelor's Degree in Physical Activity and Sports Sciences (CAFD), the use of Artificial Intelligence (AI) tools is permitted in a complementary and responsible manner, as long as it contributes to active learning, the development of critical thinking, and the improvement of students' professional skills. Under no circumstances should AI replace personal effort, direct practice, or independent reflection, which are fundamental pillars of this degree program.

### Permitted Uses of AI:

- Obtaining alternative explanations of theoretical or methodological concepts.
- Generating outlines, concept maps, or summaries to support study.
- Simulating interviews, questionnaires, or training sessions as part of methodological or research practices.
- Receiving feedback on report writing, provided that the original content is the student's own.
- Supporting the search for bibliography or scientific references, always contrasting with reliable and real academic sources, and respecting the CAFD regulations for the presentation of university work.

### Prohibited Uses of AI:

- Writing complete sections of academic papers, classroom exercises and practices, internship reports, journals, or portfolios, as well as the Final Degree Project.
- Formulating hypotheses, objectives, or conclusions for academic work.
- Replacing qualitative or quantitative data analysis with automated tools without human validation.
- Creating videos, presentations, or avatars with AI as a substitute for the student's oral or practical presentation.
- Obtaining automatic answers to tests, rubrics, or assessable activities through the use of AI.

### Citation and Attribution Guidelines:

- Any use of AI tools must be explicitly acknowledged in the submitted document (e.g., in a footnote or appendix).
- The name of the tool, the purpose of use (e.g., grammatical review, organization of ideas, interview simulation), and where it was used in the work must be indicated.
- Responsible use of AI will be evaluated within the framework of originality, academic honesty, and digital competence.

### Additional recommendations:

Students are encouraged to combine the use of AI with traditional methods (manual problem solving, practical session design, direct observation, etc.) to ensure the comprehensive development of their skills.

If there are any doubts about the permitted use of AI in a specific activity, students should consult the faculty responsible for the course.
