Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Design, develop, evaluate, adapt and apply the processes of planning and programming of physical-sport activities in the different contexts (educational, training, health and management) formal and non-formal, attending to diversity, from a multidisciplinary perspective.
- R2 Organize, plan, carry out and evaluate physical-sports activities in which people with disabilities and / or different pathologies participate in all areas of physical activity sciences, as well as cooperate with other agents involved.
- R3 Support students in their diversity in the recognition of their rights, promoting physical-sports activities as a tool for educational inclusion and personal fulfillment.
- R4 Properly argue and justify (orally and in writing) methods, techniques, exercises and physical activity programs depending on the type of population and context of application.
- R5 Describe and prioritize at a practical level the configuring elements of each of the structures (coordinative, cognitive, conditional, socio-affective, and emotional-volitional) of the different sports modalities at different ages and contexts (educational, recreational, competitive and therapeutic), taking into account diversity.
- R6 Diagnose the situation of a sports organization and the context.
- R7 Evaluate the success and viability of physical-sport activity projects and design improvement proposals, considering the evolution of organizations, needs, resources and activities.
- R8 Solve problems and make decisions with efficiency and professional ethics in the field of sports and physical activity sciences.

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R4	10,00%	Written and/or practical tests.
R3, R7, R8	10,00%	Self appraisal.
R1, R2, R3, R4, R5, R6	30,00%	Final internship report.
R2, R3, R7, R8	50,00%	Report and assessment of the External tutor.

Observations

The student may keep the assessment instruments passed during the 3 years following the first enrolment. It is necessary to obtain 50% in the self-assessment, in the final internship report, and in the external tutor's report and assessment in order to pass the subject. If any of these criteria is not met, the student will be graded with a maximum of 4.5. In the written test, the penalty system will be as follows: *Standard penalty system

No options = no subtraction

2 choices = 1 wrong subtract 100%.

3 options = 1 wrong subtract 50%.

4 options = 1 wrong subtracts 33.3%.

5 options = 1 wrong subtract 25% 6 options = 1 wrong subtract 20% *Standard penalty system

6 options = 1 wrong subtracts 20%.

This subject is NOT eligible for single assessment according to article 10.3 of the GENERAL RULES FOR ASSESSMENT AND GRADING OF OFFICIAL COURSES AND UCV's OWN DEGREES.

The detailed explanation (procedure of the tasks) as well as the assessment instruments (cards or rubrics) of each section will be published on the platform of each group at the disposal of the student.

Use of Artificial Intelligence Tools in the CAFD Degree Program

Use of Artificial Intelligence tools in the CAFD degree program In the Bachelor's Degree in Physical Activity and Sports Sciences (CAFD), the use of Artificial Intelligence (AI) tools is permitted in a complementary and responsible manner, as long as it contributes to active learning, the development of critical thinking, and the improvement of students' professional skills. Under no circumstances should AI replace personal effort, direct practice, or independent reflection, which are fundamental pillars of this degree program.

Permitted Uses of AI:

- Obtaining alternative explanations of theoretical or methodological concepts.
- Generating outlines, concept maps, or summaries to support study.
- Simulating interviews, questionnaires, or training sessions as part of methodological or research practices.
- Receiving feedback on report writing, provided that the original content is the student's own.
- Supporting the search for bibliography or scientific references, always contrasting with reliable and real academic sources, and respecting the CAFD regulations for the presentation of university work.

Prohibited Uses of AI:

- Writing complete sections of academic papers, classroom exercises and practices, internship reports, journals, or portfolios, as well as the Final Degree Project.
- Formulating hypotheses, objectives, or conclusions for academic work.
- Replacing qualitative or quantitative data analysis with automated tools without human validation.
- Creating videos, presentations, or avatars with AI as a substitute for the student's oral or practical presentation.
- Obtaining automatic answers to tests, rubrics, or assessable activities through the use of AI.

Citation and Attribution Guidelines:

- Any use of AI tools must be explicitly acknowledged in the submitted document (e.g., in a footnote or appendix).
- The name of the tool, the purpose of use (e.g., grammatical review, organization of ideas, interview simulation), and where it was used in the work must be indicated.
- Responsible use of AI will be evaluated within the framework of originality, academic honesty, and digital competence.

Additional recommendations:

Students are encouraged to combine the use of AI with traditional methods (manual problem solving, practical session design, direct observation, etc.) to ensure the comprehensive development of their skills.

If there are any doubts about the permitted use of AI in a specific activity, students should consult the faculty responsible for the course.
