

Information about the subject

Degree: Bachelor of Degree in Marine Sciences

Faculty: Faculty of Veterinary Medicine and Experimental Sciences

Code: 270207 **Name:** Assessment of Environmental Impact

Credits: 6,00 **ECTS Year:** 2, 3, 4 **Semester:** 1

Module: Optional Itinerary: Marine Environment Management, Optional Itinerary: Water Treatment

Subject Matter: Evaluation of Environmental Impact **Type:** Elective

Department: Oceanography and Environment

Type of learning: Classroom-based learning

Languages in which it is taught: English

Lecturer/-s:

OPM1

Jorge Juan Vicedo (English Responsible Lecturer)

jorge.juan@ucv.es

Module organization

Optional Itinerary: Marine Environment Management

Subject Matter	ECTS	Subject	ECTS	Year/semester
Marine Environment Geography	6,00	Geography of the marine environment	6,00	This elective is not offered in the academic year 23/24
Marine Engineering	6,00	Maritime Engineering	6,00	This elective is not offered in the academic year 23/24
Evaluation of Environmental Impact	6,00	Assessment of Environmental Impact	6,00	2, 3, 4/1
Natural and Anthropogenic Risks in the Marine Environment	6,00	Natural and Anthropogenic Risks in the marine environment	6,00	This elective is not offered in the academic year 23/24
Environmental Education	6,00	Environmental Education	6,00	2, 3, 4/1
Renewable Energies and Marine Mineral Resources	6,00	Renewable energies and marine mineral resources	6,00	This elective is not offered in the academic year 23/24

Optional Itinerary: Water Treatment

Subject Matter	ECTS	Subject	ECTS	Year/semester
Engineering of Water Treatment Systems	6,00	Engineering of water treatment systems	6,00	This elective is not offered in the academic year 23/24

Characterization of Water Quality	6,00	Characterisation of water quality	6,00	This elective is not offered in the academic year 23/24
Water Treatment Systems	6,00	Water treatment systems	6,00	This elective is not offered in the academic year 23/24

Recommended knowledge

None

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student knows and understands with a critical attitude the concepts that are included in the syllabus/contents of the subject of Environmental Impact Assessment.
- R2 The student is able to solve problems related to the assessment of environmental impacts of a specific project in coastal areas
- R3 The student seeks bibliographical information from different sources and is able to analyze it with a critical and constructive spirit.
- R4 The student is able to elaborate and present works on the basic contents of the subject and to work in a team.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB2	Students are able to apply knowledge to their work in a professional way and have the competences enabling them to state and defend views and opinions as well as perform problem-solving tasks in their field of study.				X
CB3	Students are able to collect and interpret relevant data (generally in their field of study) and give opinions that involve reflection on relevant social, scientific or ethical issues.				X
CB5	Students develop the necessary learning skills to undertake further studies with a high level of autonomy.				X

GENERAL		Weighting			
		1	2	3	4
CG1	Capacity to analyze and synthesize				X
CG2	Capacity to organize and plan				X
CG3	Mastering Spanish oral and written communication			X	
CG5	Knowing and applying Basic ITC skills related to marine science				X
CG6	Capacity to manage information (capacity to look for and analyze information coming from different types of sources)				X
CG7	Decision making				X
CG8	Capacity to work in interdisciplinary and multidisciplinary team				X
CG10	Critical and self-critical capacity				X

Year 2023/2024

270207 - Assessment of Environmental Impact

CG11	Capacity to learn			X
CG12	Capacity to adapt to new situations			X
CG16	Capacity to apply theoretical knowledge			X
CG17	Research skills			X
CG18	Sensibility to environmental issues.			X

techniques of water column, organisms, as well as basic techniques of dynamic measurement		X	
sustaining use of marine resources and		X	
environmental use planning techniques as well as management			X
remote sensing techniques		X	
processing and interpreting oceanographic recent theories		X	
diagnosing new problems and proposing solution			X
conducting experiments and measurements both in field and sample collection			X
planning, designing and implementing research and assessing results			X
conducting field and laboratory experiments in a safe environment promoting teamwork			X
hydrographic and mapping sea bottoms and coastal areas			X

CE13	Looking for and assessing different kinds of marine resources				X
CE14	Designing patterns of marine protected areas management			X	
CE15	Identifying and proposing monitoring means for problems of marine pollution			X	
CE16	Proposing management models for endangered species recovery centers			X	
CE17	Developing training programs for marine and coastal areas			X	
CE19	Deeply understanding operating systems of maritime orientated companies, identifying their problems and proposing solutions				X
CE22	Practical experience of methods of marine environmental impact assessment				X

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	50,00%	Written test with theoretical and practical questions
R1, R2, R3, R4	35,00%	Delivery of guided assignments, whose objectives and contents will be proposed by the teacher
R1, R2, R3, R4	15,00%	Oral presentation

Observations

Attendance to all the practical sessions of the subject is compulsory in order to pass that subject. Additionally, to submit a report of practical cases (optional), composed by the resolution of different proposed exercises in both theory and practical lectures, may add up to 0.5 extra points on the final subject mark.

MENTION OF DISTINCTION:

According to Article 22 of the Regulations governing the Evaluation and Qualification of UCV Courses, the mention of "Distinction of Honor" may be awarded by the professor responsible for the course to students who have obtained, at least, the qualification of 9 over 10 ("Sobresaliente"). The number of "Distinction of Honor" mentions that may be awarded may not exceed five percent of the number of students included in the same official record, unless this number is lower than 20, in which case only one "Distinction of Honor" may be awarded.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge.
- M2 Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity.
- M4 Supervised monographic sessions with shared participation.
- M5 Application of multidisciplinary knowledge.
- M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.
- M8 Set of oral and/or written tests used in initial, formative or additive assessment of the student.
- M9 Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)
- M10 Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es).

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS M1	R1, R2, R3, R4	30,00	1,20
PRACTICAL CLASSES M2	R1, R2, R3, R4	18,00	0,72
SEMINAR M4	R2, R3, R4	3,00	0,12
GROUP PRESENTATION OF ASSIGNMENTS M5	R1, R2, R3, R4	4,00	0,16
TUTORIAL M6	R1, R2, R3, R4	3,00	0,12
ASSESSMENT M8	R1, R2, R3, R4	2,00	0,08
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
GROUP WORK M9	R1, R2, R3, R4	30,00	1,20
INDEPENDENT WORK M10	R1, R2, R3, R4	60,00	2,40
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
Didactic Unit 1. Introduction to Environmental Impact Assessment (EIA)	Unit 1.-Development and impact on the environment. Sustainable development. Need for Environmental Impact Studies with emphasis on the problems of the marine and maritime-terrestrial domain. Unit 2.- Historical perspective and concept of EIA. Typology and general characteristics of Environmental Impact Studies. Specific characteristics of the EIA in the marine and maritime-terrestrial domain. Environmental Diagnosis.
Didactic Unit 2.- Legislative framework of the EIA	Unit 3.- The European legislation on the environment management and Environmental Impact. Common adaptation of the states. Unit 4.- Legislation on Environmental Impact in Spain. Transference of competences to the regions: practical implications

Didactic Unit 3.- Structure, content and general methodology in environmental impact studies (EIA)

Unit 5.-The EIA as a technical document. Structure of the EIA.

Unit 6.- Project definition.

Unit 7.-The environmental inventory I: Definition and Objective. Project Environment. Contents of the environmental inventory.

Unit 8.-The environmental inventory II: Abiotic environment. Characterization, data collection and indicators.

Unit 9.-The environmental inventory III: Biotic environment. Characterization, data collection and indicators.

Unit 10.-The environmental inventory IV: Socioeconomic environment. Characterization, data collection and indicators.

Unit 11.-Identification and assessment of impacts. Synthesis methodology. Valuation criteria. Qualitative and quantitative assessment. Integration of information and documentation. Social acceptance of the project.

Unit 12.-Mitigation of Environmental Impact. Proposal of preventive, corrective and compensatory measures of Environmental Impact. Synthesis document. Environmental Vigilance Plan. Contents and scope.

Unit 13.- The Strategic Environmental Assessment (SEA). Conceptual bases, objectives and differential characteristics. Community and national legislation. SEA in the marine and maritime-terrestrial domain.

Didactic Unit 4.- Environmental problems and specific actions in the maritime and maritime-terrestrial domain

Unit 14.- Population and industrial development in coastal areas: problems, management and impacts on the marine and maritime-terrestrial domain.

Unit 15.- Tourist and urban development in coastal areas: problems, management and impacts in the marine and maritime-terrestrial domain.

Organization of the practical activities:

	Content	Place	Hours
PR1.	Preliminary analysis of previous EIAs: identification and description of impacts	Lecture room	2,00
PR2.	Critical analysis of previous EIAs: incidences in the environmental inventory and valuation.	Lecture room	2,00
PR3.	Critical analysis of previous EIA: proposal of alternatives and reformulation of preventive, corrective and compensatory measures.	Lecture room	2,00
PR4.	Search for information related to environmental legislation and its inclusion in the ESIA.	Computer	2,00
PR5.	Elaboration of the EIAs. Characterization of the abiotic and biotic environment: integration of geographical, geological, edaphological, climatic, floristic and vegetation, faunistic and ecological data in the EIA.	Computer	2,00
PR6.	Elaboration of the EIA II. Characterization of the socioeconomic environment: integration of local development data, infrastructures, economic indicators and artistic-cultural heritage. Identification and assessment of impacts. Qualitative, semi-quantitative and quantitative techniques for impact assessment. Modelling.	Computer	2,00
PR7.	Elaboration of the EIAs III. Proposal of measures to mitigate environmental impact and establishment of a monitoring plan.	Computer	2,00

PR8.	Field trip (to be determined). Objective: to visit various activities and discuss the usefulness of Environmental Impact Assessment as a procedure to integrate the environmental variable in decision making.	Field visit	4,00
------	---	-------------	------

Temporary organization of learning:

Block of content	Number of sessions	Hours
Didactic Unit 1. Introduction to Environmental Impact Assessment (EIA)	4,00	8,00
Didactic Unit 2.- Legislative framework of the EIA	4,00	8,00
Didactic Unit 3.- Structure, content and general methodology in environmental impact studies (EIA)	18,00	36,00
Didactic Unit 4.- Environmental problems and specific actions in the maritime and maritime-terrestrial domain	4,00	8,00

Addendum to the Course Guide of the Subject

Due to the exceptional situation caused by the health crisis of the COVID-19 and taking into account the security measures related to the development of the educational activity in the Higher Education Institution teaching area, the following changes have been made in the guide of the subject to ensure that Students achieve their learning outcomes of the Subject.

Situation 1: Teaching without limited capacity (when the number of enrolled students is lower than the allowed capacity in classroom, according to the security measures taken).

In this case, no changes are made in the guide of the subject.

Situation 2: Teaching with limited capacity (when the number of enrolled students is higher than the allowed capacity in classroom, according to the security measures taken).

In this case, the following changes are made:

1. Educational Activities of Onsite Work:

All the foreseen activities to be developed in the classroom as indicated in this field of the guide of the subject will be made through a simultaneous teaching method combining onsite teaching in the classroom and synchronous online teaching. Students will be able to attend classes onsite or to attend them online through the telematic tools provided by the university (videoconferences). In any case, students who attend classes onsite and who attend them by videoconference will rotate periodically.

In the particular case of this subject, these videoconferences will be made through:

☒

Microsoft Teams

☐

Kaltura

Situation 3: Confinement due to a new State of Alarm.

In this case, the following changes are made:

1. Educational Activities of Onsite Work:

All the foreseen activities to be developed in the classroom as indicated in this field of the guide of the subject, as well as the group and personalized tutoring, will be done with the telematic tools provided by the University, through:

☒

Microsoft Teams

☒

Kaltura

Explanation about the practical sessions:

2. System for Assessing the Acquisition of the competences and Assessment System

ONSITE WORK

Regarding the Assessment Tools:

☒ The Assessment Tools will not be modified. If onsite assessment is not possible, it will be done online through the UCVnet Campus.

☐ The following changes will be made to adapt the subject's assessment to the online teaching.

Course guide		Adaptation	
Assessment tool	Allocated percentage	Description of the suggested changes	Platform to be used

The other Assessment Tools will not be modified with regards to what is indicated in the Course Guide.

Comments to the Assessment System:
