Assessment system for the acquisition of competencies and grading system

| Assessed learning outcomes | Granted percentage | Assessment method |
|----------------------------|-----------------------|---|
| R1, R2, R3 | 50,00% | Written test with theoretical and practical questions |
| R1, R2, R3 | 30,00% | Delivery of guided assignments, whose objectives and contents will be proposed by the teacher |
| R1, R2, R3 | 20,00% | Oral presentation |

Observations

The written test with theoretical and practical questions will consist of a multi-choice multiple choice test, of which only one is true (the poorly answered answers will be subtracted) and short questions that will include aspects seen in class as well as those seen in practices or in seminars. This part will also include questions to assess the knowledge acquired in the laboratory.

The delivery of directed works, whose objectives and contents will be proposed by the teacher will consist of a series of activities of group or individual work and rapid classroom tests.

In the case of the exhibition of works, a continuous evaluation of the team will be carried out regarding meetings carried out, advance in the contents. Valueing the content of the work, attitude and participation of each one of the members with respect to the rest, exhibition orally jointly and individually. The written part of the work will also be valued.

Students who for justified reason can not attend class, not participating in the activities that may arise during the classroom sessions, must communicate before the day in question to find an alternative to these works. In the case of absence is not justified there will be no possibility of recovery.

The tasks and activities proposed throughout the course will be corrected and evaluated, and there is no possibility of recovering them

MENTION OF DISTINCTION:

According to Article 22 of the Regulations governing the Evaluation and Qualification of UCV Courses, the mention of "Distinction of Honor" may be awarded by the professor responsible for the course to students who have obtained, at least, the qualification of 9 over 10 ("Sobresaliente"). The number of "Distinction of Honor" mentions that may be awarded may not exceed five percent of the number of students included in the same official record, unless this number is lower than 20, in which case only one "Distinction of Honor" may be awarded.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

| M1 | Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge. |
|----|--|
| M2 | Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, |
