

Information about the subject

Degree: Bachelor of Science Degree in Marine Sciences

Faculty: Faculty of Veterinary Medicine and Experimental Sciences

Code: 270209 **Name:** Geography of the marine environment

Credits: 6,00 **ECTS Year:** 2 **Semester:** 1

Module: Optional Itinerary: Marine Environment Management, Optional Itinerary: Ocean Dynamics

Subject Matter: Marine Environment Geography **Type:** Elective

Department: Oceanography and Environment

Type of learning: Classroom-based learning

Languages in which it is taught:

Lecturer/-s:

Module organization

Optional Itinerary: Marine Environment Management

Subject Matter	ECTS	Subject	ECTS	Year/semester
Marine Environment Geography	6,00	Geography of the marine environment	6,00	2/1
Marine Engineering	6,00	Maritime Engineering	6,00	2/1
Evaluation of Environmental Impact	6,00	Assessment of Environmental Impact	6,00	This elective is not offered in the academic year 21/22
Natural and Anthropogenic Risks in the Marine Environment	6,00	Natural and Anthropogenic Risks in the marine environment	6,00	This elective is not offered in the academic year 21/22
Environmental Education	6,00	Environmental Education	6,00	2, 3, 4/1
Renewable Energies and Marine Mineral Resources	6,00	Renewable energies and marine mineral resources	6,00	2/1

Optional Itinerary: Ocean Dynamics

Subject Matter	ECTS	Subject	ECTS	Year/semester
Dynamic Physical Oceanography	6,00	Dynamic Physical Oceanography	6,00	This elective is not offered in the academic year 21/22
Paleoceanography	6,00	Paleoceanography	6,00	This elective is not offered in the academic year 21/22

Mathematical Models	6,00	Mathematical Models	6,00	This elective is not offered in the academic year 21/22
Tracers in Oceanography	6,00	Tracers in Marine Sciences	6,00	This elective is not offered in the academic year 21/22
Atmosphere-Ocean Interaction	6,00	Atmosphere-Ocean Interaction	6,00	This elective is not offered in the academic year 21/22

Recommended knowledge

Not contemplated

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student knows the main characteristics of the physical and human environment of the marine environment on a global scale,
- R2 The student knows the main characteristics of the physical and human environment of transition environments on a global scale.
- R3 The student knows the main resources of the marine environment.
- R4 The student understands the marine environment as a means of communication and its economic implications.
- R5 The student knows the importance of the sea in the framework of globalization.
- R6 The student can recognize the main landmarks of the geopolitics of the sea.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB2	Students are able to apply knowledge to their work in a professional way and have the competences enabling them to state and defend views and opinions as well as perform problem-solving tasks in their field of study.			X	
CB3	Students are able to collect and interpret relevant data (generally in their field of study) and give opinions that involve reflection on relevant social, scientific or ethical issues.			X	
CB5	Students develop the necessary learning skills to undertake further studies with a high level of autonomy.			X	

GENERAL		Weighting			
		1	2	3	4
CG1	Capacity to analyze and synthesize			X	
CG2	Capacity to organize and plan			X	
CG3	Mastering Spanish oral and written communication		X		
CG5	Knowing and applying Basic ITC skills related to marine science			X	
CG6	Capacity to manage information (capacity to look for and analyze information coming from different types of sources)			X	
CG7	Decision making		X		
CG8	Capacity to work in interdisciplinary and multidisciplinary team			X	
CG10	Critical and self-critical capacity			X	

CE13	Looking for and assessing different kinds of marine resources				X
CE14	Designing patterns of marine protected areas management				X
CE15	Identifying and proposing monitoring means for problems of marine pollution				X
CE16	Proposing management models for endangered species recovery centers				X
CE17	Developing training programs for marine and coastal areas				X
CE18	Practical experience of researching into marine climate		X		
CE19	Deeply understanding operating systems of maritime orientated companies, identifying their problems and proposing solutions				X
CE22	Practical experience of methods of marine environmental impact assessment				X

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4, R5, R6	50,00%	Written test with theoretical and practical questions
R1, R2, R3, R4, R5, R6	30,00%	Delivery of guided assignments, whose objectives and contents will be proposed by the teacher
R1, R2, R3, R4, R5, R6	20,00%	Oral presentation

Observations

MENTION OF DISTINCTION:

According to Article 22 of the Regulations governing the Evaluation and Qualification of UCV Courses, the mention of "Distinction of Honor" may be awarded by the professor responsible for the course to students who have obtained, at least, the qualification of 9 over 10 ("Sobresaliente"). The number of "Distinction of Honor" mentions that may be awarded may not exceed five percent of the number of students included in the same official record, unless this number is lower than 20, in which case only one "Distinction of Honor" may be awarded.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge.
- M2 Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity.
- M4 Supervised monographic sessions with shared participation.
- M5 Application of multidisciplinary knowledge.
- M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.
- M8 Set of oral and/or written tests used in initial, formative or additive assessment of the student.
- M9 Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)
- M10 Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es).

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS M1	R1, R2, R3, R4, R5, R6	25,00	1,00
PRACTICAL CLASSES M2	R1, R2, R3, R4, R5, R6	15,00	0,60
SEMINAR M4	R1, R2, R3, R4, R5, R6	3,00	0,12
GROUP PRESENTATION OF ASSIGNMENTS M5	R1, R2, R3, R4, R5, R6	12,00	0,48
TUTORIAL M6	R1, R2, R3, R4, R5, R6	3,00	0,12
ASSESSMENT M8	R1, R2, R3, R4, R5, R6	2,00	0,08
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
GROUP WORK M9	R1, R2, R3, R4, R5, R6	20,00	0,80
INDEPENDENT WORK M10	R1, R2, R3, R4, R5, R6	70,00	2,80
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
CONTENTS	The human occupation of the coast; The sea as a source of food resources; The sea as a means of communication; Economic activities on the coast; The geopolitics of the sea.

Temporary organization of learning:

Block of content	Number of sessions	Hours
CONTENTS	30,00	60,00
