

Information about the subject

Degree: Bachelor of Degree in Marine Sciences

Faculty: Faculty of Veterinary Medicine and Experimental Sciences

Code: 271104 **Name:** Physics

Credits: 6,00 **ECTS Year:** 1 **Semester:** 1

Module: Fundamental Science

Subject Matter: Physics **Type:** Basic Formation

Field of knowledge: Sciences

Department: Basic and Cross-disciplinary Sciences

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

271A	<u>Amanda Sancho Garcia</u> (Responsible Lecturer)	amanda.sancho@ucv.es
	<u>Mario Zacaes Gonzalez</u>	mario.zacaes@ucv.es

Module organization

Fundamental Science

Subject Matter	ECTS	Subject	ECTS	Year/semester
Physics	12,00	Fluid Mechanics	6,00	1/2
		Physics	6,00	1/1
Mathematics	6,00	Mathematics	6,00	1/1
Chemistry	12,00	Chemistry	6,00	1/1
		Chemistry of Aqueous Solutions	6,00	1/2
Biology	12,00	Biochemistry	6,00	1/2
		Biology	6,00	1/1
Geology	6,00	Geology	6,00	1/2

Recommended knowledge

Bachelor level mathematics: elementary functions, trigonometry, differential and integral calculus.

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student is capable of solving problems about the content of the subjects through a well-founded approach, a clear development and a resolution coinciding with the expected result.
- R2 The student actively participates in solving problems in the classroom.
- R3 The student discriminates false statements from the true ones on physical concepts explained in the development of the subject.
- R4 The student is capable of seeking information from different sources and knows how to analyse it.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB1	Students acquire and understand knowledge in their field of study based on general secondary education but usually reaching a level that, although supported on advanced text books, also includes aspects involving state-of-the-art knowledge specific to their area.				X
CB2	Students are able to apply knowledge to their work in a professional way and have the competences enabling them to state and defend views and opinions as well as perform problem-solving tasks in their field of study.		X		
CB5	Students develop the necessary learning skills to undertake further studies with a high level of autonomy.			X	

GENERAL		Weighting			
		1	2	3	4
CG1	Capacity to analyze and synthesize				X
CG2	Capacity to organize and plan			X	
CG3	Mastering Spanish oral and written communication		X		
CG5	Knowing and applying Basic ITC skills related to marine science	X			
CG6	Capacity to manage information (capacity to look for and analyze information coming from different types of sources)		X		
CG7	Decision making	X			
CG8	Capacity to work in interdisciplinary and multidisciplinary team		X		
CG10	Critical and self-critical capacity	X			

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1	50,00%	Written test with theoretical and practical questions
R1, R2, R4	30,00%	Delivery of guided assignments, whose objectives and contents will be proposed by the teacher
R1, R3	20,00%	Problem-solving and issues related to the use of specific software

Observations

According to the general evaluation and qualification regulations, the preferred evaluation system will be continuous evaluation and will be implemented by means of exercises and self-assessments on the virtual campus throughout the course. In order to obtain the grades, these assignments must be completed before the deadline. This subject cannot be assessed by means of a single assessment.

In order to pass the course, a grade equal to or higher than 5 is required in each item. In the event of not exceeding the minimum grade required in one of the sections, the course will be failed even if the weighted average is equal to or greater than 5. In this case, the grade that will appear in the minutes will be 4.

All the parts in which the student has not reached the minimum grade required may be resat in the second call. The teacher will publish the deadlines on the virtual campus

The use of tools based on artificial intelligence (AI) is subject to the teacher's criteria, who may establish specific limits or conditions depending on the training or assessment activity.

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge.
- M2 Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity.
- M5 Application of multidisciplinary knowledge.
- M6 Personalized and small group attention. Period of instruction and/or guidance carried out by a tutor to review and discuss materials and topics presented in classes, seminars, readings, papers, etc.
- M8 Set of oral and/or written tests used in initial, formative or additive assessment of the student.
- M9 Group preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)
- M10 Student's study: Individual preparation of readings, essays, problem-solving, seminars, papers, reports, etc. to be presented or submitted in theoretical, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es).

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS M1	R1, R2	41,00	1,64
PRACTICAL CLASSES M2	R1, R2	14,00	0,56
TUTORIAL M6	R1, R3	2,00	0,08
ASSESSMENT M8	R1, R3, R4	3,00	0,12
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
GROUP WORK M9	R1, R4	20,00	0,80
INDEPENDENT WORK M10	R1, R3, R4	70,00	2,80
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
UNIT 1. DIMENSIONAL ANALYSIS AND ERROR ANALYSIS	<ul style="list-style-type: none">1.1 Physical magnitudes and their classification1.2 Dimensional analysis1.3 Unit systems <p>Lesson 2. Error analysis</p> <ul style="list-style-type: none">2.1 Error analysis<ul style="list-style-type: none">2.1.1 Error classification2.1.2 Error and measurement expression2.1.3 Estimation of direct measurement errors2.1.4 Estimation of indirect measurement errors2.2 Fit of experimental data<ul style="list-style-type: none">2.2.1 Correlation analysis2.2.2 Least square fit
UNIT 2. MECHANICS	<p>Lesson 3. Particle kinematics</p> <ul style="list-style-type: none">3.1 1D motion3.2 2D motion3.3 Circular movement3.4 Relative motion <p>Lesson 4. Particle dynamics</p> <ul style="list-style-type: none">4.1 Newton's Laws4.2 Forces4.3 Moment of force4.4 Linear and angular momentum4.5 Dynamics of the relative motion <p>Lesson 5. Work and Energy</p> <ul style="list-style-type: none">5.1 Work and kinetic energy5.2 Conservation Laws5.3 Power

UNIT 3. GRAVITATIONAL INTERACTION

Lesson 6. Gravitational interaction

6.1. Kepler's Law

6.2. Universal Gravitational Law

6.3. Gravity field

6.4. Gravitational potential energy

6.5. Tides dynamics

6.5.1. Horizontal and vertical components of the tide force

6.5.2. Comparison between the Moon tide force and the

Sun tide force

6.5.3. Amphidromic point

UNIT 4. WAVE PHYSICS

Lesson 7. Wave motion

7.1 Wave motion description

7.2 Simple harmonic motion

7.3 Wave interferences

7.4 Energy and intensity

7.5 Standing waves

7.6 Reflection, Refraction, Diffraction

7.7 Doppler effect

Organization of the practical activities:

	Content	Place	Hours
PR1.	Exercises: dimensional analysis	Lecture room	1,00
PR2.	Exercises: types of errors	Lecture room	1,00
PR3.	Types of errors	Boat	1,00
PR4.	Experimental determination of types of errors	Marine station	1,00
PR5.	Exercises: 1D motion	Lecture room	1,00
PR6.	Exercises: 2D motion	Lecture room	1,00
PR7.	Exercises: circular motion	Lecture room	1,00
PR8.	Exercises: relative motion	Lecture room	2,00
PR9.	Exercises: particle dynamics	Lecture room	2,00
PR10.	Exercises: work and energy	Lecture room	1,00
PR11.	Exercises: gravitational interaction	Lecture room	1,00
PR12.	Exercises: wave motion	Lecture room	1,00

Temporary organization of learning:

Block of content	Number of sessions	Hours
UNIT 1. DIMENSIONAL ANALYSIS AND ERROR ANALYSIS	7,00	14,00
UNIT 2. MECHANICS	16,00	32,00
UNIT 3. GRAVITATIONAL INTERACTION	3,00	6,00
UNIT 4. WAVE PHYSICS	4,00	8,00
