Module organization

Procedural Law

Subject Matter	ECTS	Subject	ECTS	Year/semester
Procedural Law	18,00	Procedural Law I	6,00	2/2
		Procedural Law II	6,00	3/1
		Procedural Law III	6,00	4/1

Recommended knowledge

Procedural Law I should be studied before Procedural Law II, although this is not essential.

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 To know how to adapt the legal-procedural concepts seen in the general part on jurisdiction, action and process, as well as their constitutional and jurisprudential reading, to their correlatives in matters of civil procedural protection.
- R2 To know the civil jurisdiction, analyzing its courts and competence.
- R3 To know how to analyze civil action and its practical development.
- R4 To become familiar with the use of out-of-court methods of conflict resolution (Alternative Dispute Resolution) under private law (civil and commercial), especially mediation as a self-composing mechanism and arbitration as a heterocomposing method.

Competencies

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3	50,00%	Practical tests
R1, R2, R3, R4	15,00%	Attendance, active participation and favourable attitude in the subject/ course/ module
R1, R2, R4	35,00%	Written theoretical tests

Observations

1ª) The official exam will consist of two tests: a theoretical one and a practical one, both multiple-choice tests, although students may choose to take the exam orally. Students must obtain a minimum of 4 points out of 10 in the theoretical exam and in the practical exam to make the average and to be able to sum the other assessment instruments. However, in the 2nd call, the practices presented throughout the course will not be taken into account, neither the assistance and participation. The student must do a practical questionnaire and a theoretical questionnaire the same date of the official exam. The mark obtained in said tests will represent 100% of the final grade (50% theoretical and 50% practical).

2ª) In relation to the concept of "attendance, active participation and a favourable attitude in the subject" (15%), the mere attendance or physical presence at classes will not compute anything: the 15% will derive from the favourable attitude in the subject. The assessment will be made through the records of attendance and the quality of the participation.

3ª) Students must obtain a minimum of 5 points out of 10, both in 1st or 2nd call, to pass the subject.

4ª) According to Article 9 of the General Regulations for the Assessment and Grading of Official Studies and UCV-Specific Degrees, the single assessment is linked to the inability of students enrolled in a face-to-face degree program to attend. It is, therefore, an extraordinary and exceptional assessment system available to students who, with justified and accredited documentation, are unable to submit to the continuous assessment system. They may request this from the professor responsible for the subject, who will expressly decide whether to accept the student's request for a single assessment and will inform them of the acceptance/denial.

Regarding the subject of Procedural Law I, the minimum attendance requirement is 70%. This is the limit to be considered for any potential request for a single assessment:

- If granted, the 15% required for attendance, active participation, and a favorable attitude in the subject will be increased by the percentage of the final theoretical exam taken during the official

exam period.

- In the second sitting, the same assessment criteria will apply as for students who do not have a single assessment (since attendance, active participation, and a favorable attitude in the subject are not taken into account).

5^a) **Use of AI in the course:**

- Students may use AI for any course-related questions and may even provide it with statements, exercises, or assessment tests to obtain automated answers, as long as these are verified and validated by the students themselves. For this purpose, faculty may perform the appropriate checks.

- Students may not use AI:

- To record or transcribe, in whole or in part, any classroom activity, in order to obtain summaries or notes created by AI.

- To enter notes or any other material created by the faculty who provided it into AI tools such as ChatGPT or other non-institutional tools whose information is not stored in controlled environments.

- Citation and attribution criteria:

- Any use of AI tools must be explicitly stated in the submitted document (e.g., in a footnote or appendix).

- The name of the tool, the purpose of use (e.g., grammar check, organization of ideas, writing sample), and the part of the work where it was used must be indicated.

- Responsible use of AI will be evaluated as part of the criteria for originality and academic honesty.

CLASS ATTENDANCE IN FACE-TO-FACE DEGREES

In accordance with the development guidelines of the General Regulations for the Evaluation and Qualification of Official Teachings and Own Degrees of the UCV, in face-to-face degrees, class attendance with a minimum of 80% of the sessions of each subject will be required as a requirement to be evaluated. This means that, if a student does not attend the sessions of each subject, in a percentage greater than 20%, he/she will not be able to be evaluated, neither in the first nor in the second call, unless the person responsible for the subject, with the approval of the person responsible for degree, in view of duly justified exceptional circumstances, exempt from the minimum attendance percentage. The same criterion will be applicable for hybrid or virtual degrees in which teachers must maintain the same percentage in the requirement of "presence" in the different training activities, if any, even if these are carried out in virtual environments.

MENTION OF DISTINCTION:

The mention of "Honors" may be awarded to students who have obtained a grade equal to or greater than 9.0. Their number may not exceed five percent of the students enrolled in a group in the corresponding academic year, unless the number of students enrolled is lower.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Group work sessions supervised by the teacher. Study of legal cases, both true and fictitious. Significant construction of knowledge through student interaction and activity. Critical analysis of values and social commitment.
- M3 Sessions where the students defend an assumption from different points of view . Various roles are played, such as lawyer, judge, prosecutor, court clerk, etc.
- M4 The students, guided by the teachers, must attend real trials, as long as they can be accessed following the existing legislation.
- M8 Exposition of contents by the teacher, analysis of competences, explanation and demonstration of capacities, skills and knowledge in the classroom.
- M11 Personalised attention and in small groups. Period of instruction and/or orientation carried out by a tutor with the aim of reviewing and discussing the materials and topics presented in the classes, seminars, readings, completion of assignments, etc.
- M12 Set of written and/or oral tests used in the initial, formative or summative evaluation of the student.
- M13 Group preparation of readings, essays, resolution of problems, seminars, papers, dossiers, etc., to be presented or delivered in theory classes, practical classes, and/or small group tutorials.
- M14 Student's study: individual preparation of readings, essays, problem-solving, seminars, works, reports, etc. to present or deliver in the theoretical classes, practical classes and/or small group tutorials.
