

Information about the subject

Degree: Bachelor of Science Degree in Nursing

Faculty: Faculty of Medicine and Health Sciences

Code: 1211202 **Name:** Ethics and Professional Deontology in Nursing

Credits: 6,00 **ECTS Year:** 2 **Semester:** 2

Module: Holistic education

Subject Matter: Ethics **Type:** Basic Formation

Field of knowledge: Arts and humanities

Department: Theology, Social Doctrine of the Church and Deontology or Professional Ethics

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

121PAA Juan Eduardo Santon Moreno (**Responsible Lecturer**)

je.santon@ucv.es

121PAJ Francesco Trabalza (**Responsible Lecturer**)

francesco.trabalza@ucv.es

Module organization

Holistic education

Subject Matter	ECTS	Subject	ECTS	Year/semester
Ethics	6,00	Ethics and Professional Deontology in Nursing	6,00	2/2
Philosophy	6,00	Social Doctrine of the Catholic Church	6,00	2/1
Antropology	6,00	Anthropology	6,00	1/1

Recommended knowledge

Not required

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 That the student is capable, in the field of nursing, of providing technical and professional health care appropriate to the health needs of the people they serve, in accordance with the state of development of scientific knowledge at any given time and with the levels of quality and safety established in the applicable legal and deontological standards.
- R2 That the student knows and applies the theoretical and methodological foundations and principles of nursing.
- R3 That students understand people without prejudice, considering their physical, psychological and social aspects, as autonomous and independent individuals, ensuring respect for their opinions, beliefs and values, guaranteeing the right to privacy, through confidentiality and professional secrecy.
- R4 That the student is able to promote and respect the right to participation, information, autonomy and informed consent in the decision making of the people assisted, according to the way they live their health process - illness.
- R5 That the student knows the ethical and deontological code of the Spanish nursing, understanding the ethical implications of health in a world context in transformation.
- R6 That the student is able to analyze and incorporate in a critical way the most relevant issues of today's society that affect health care and health.
- R7 That the student is able to recognize the essential elements of the nursing profession, including ethical and deontological principles.
- R8 The student should be able to understand the importance of such principles for the benefit of the patient, society and the profession, with special attention to professional secrecy and the defence of life.
- R9 The student should be able to apply the principle of social justice to professional practice.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB1	Students have demonstrated possession and understanding of knowledge in an area of study that is at the core of general secondary education, and is often at a level that, while supported by advanced textbooks, also includes some aspects that involve knowledge from the cutting edge of their field of study.	x			
CB2	Students are able to apply their knowledge to their work or vocation in a professional way and possess the skills usually demonstrated by developing and defending arguments and solving problems within their area of study.		x		
CB3	Students have the ability to gather and interpret relevant data (usually within their area of study) to make judgments that include reflection on relevant social, scientific or ethical issues.			x	
CB4	That students can convey information, ideas, problems and solutions to both specialized and non-specialized audiences.	x			
CB5	Students have developed those learning skills necessary to undertake further study with a high degree of autonomy.	x			
GENERAL		Weighting			
		1	2	3	4
CG0	Good Public Speaking.		x		
SPECIFIC		Weighting			
		1	2	3	4
1i	To analyse and incorporate in a critical way questions more relevant to society in the present times that affect the attention to health and disease		x		

2i	To acknowledge the essential element of the nursing profession including the ethical and the deontological principles.				X
3i	To understand the importance of such principles for the benefit of the patient, society and of the nursing profession with special attention to the professional secret and to the defence of life.				X
4i	To apply the principle of social justice to professional practice.		X		

TRANSVERSAL		Weighting			
		1	2	3	4
1	To be able, within the framework of nursing, to give technical and professional care to carers, of the correct needs of these persons in agreement with development of the scientific knowledge in each moment and with the levels of quality and safety that are established by the legal and the deontological norms which are applicable.				X
3	To know and apply the fundamentals and theoretical and methodological principles of nursing.	X			
7	To understand people without prejudices, taking into account their physical, psychological, and social aspects, as independent and autonomous individuals, ensuring respect for their opinions, beliefs or values, always guaranteeing their right to privacy through professional confidentiality and secrecy.				X
8	To promote and respect the right to participate in decision taking for the patients in agreement with the way in which they live their process of health – disease			X	
12	To know the ethical and deontological codes of Spanish nursing, understanding the ethical implications of health in a world which is continuously changing.				X

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R3, R4, R5, R6, R7, R8	55,00%	Theoretical written exams
R1, R2, R3, R4, R5, R6, R7, R8, R9	40,00%	Practical tests and works
R1, R5, R7	5,00%	Attendance and active participation

Observations

The written paper will consist of:

- Multiple choice questions with 4 possible answers and only one option. Each wrong answer will be deducted according to the formula: $A - (E/n - 1)$, in this formula A= hit; E= error, n= number of alternatives.
- Essay questions.

In order to pass the course it will be indispensable to obtain at least 50% of the value of the written exam (2,75 points). This criterion also holds for the second opportunity examination.

Practices will be carried out throughout the course in groups or individually, in person or by means of the University platform, as directed by the professor. **Deontological work** will be performed and delivered as indicated at the University platform.

Misspellings, grammatical inconsistencies that appear in texting language in tasks, examinations or other assessment tools, will suppose the loss of 10% of the score given to the exercise. This measure should be applied in all assessment instruments.

Students who on the first call, do not pass the written test for not reaching 50% of its value (2.75), must appear at the second call, reserving the notes of the deontological work, of the continuous assessment work made during the course and attendance and participation; the note that will appear to the students will be the one obtained in the written test over 10. Likewise, they will be able to carry out the works that they have not done during the course, having to adjust to the delivery date that will be indicated on the platform and that will always be before the written test of the second call

Students who have passed the written exam, but have failed the subject, will be able to present the works that have not been done during the course, having to adjust to the delivery deadline that will always be before the second call exam. to the written test, but it can be done, taking into account that the final grade will be the second call.

Development of the subject in second and successive enrollments.

The student will enroll in a group S (suspended), which does not have teaching as such. The subject will be included in the semester that is taught in the ordinary group. Depending on the number of students they will be included in the tutorials and follow-up of the teacher of the ordinary subject or group tutorials will be carried out, contacting the students with the responsible teacher through the Virtual Campus to indicate the days and hours of the corresponding tutorials.

The evaluation criteria will be the following:

- Written objective test: the same as that of the first enrollment students. With a value of 5.5.
- Presentation of 2 individual works that will be proposed by the teacher with a maximum value of 2.25 points each, and which must be delivered in the date indicated by the same and in the manner indicated on the University Platform.

Development of the subject for Exchange Students

The Erasmus / Mundus student enrolled in the subjects of the UCV degree in nursing, must send the professor of the subject an email / virtual tutoring communicating their situation. When a student who has been granted an ERASMUS / MUNDUS / SICUE mobility, plans to carry out their mobility in the second semester and has to take the second examination in any of the subjects studied, it will be the coordinator of course who marks the dates in coordination with the person in charge of the subject and the international coordinator. In these cases, the second calls will be held once the mobility period has ended and the students will know the dates before leaving for their destination country.

The evaluation criteria will be the following:

- Written test with the same content and on the same day as the rest of the classmates (if they have completed the mobility). If at the time of the exam they are still in an ERASMUS situation, they will contact the professor of the subject to specify an exam date.
- The work, practices and classroom activities will be carried out through the virtual campus, having the same evaluation criteria as the rest of their classmates.
- Attendance and participation will be evaluated according to the communication and interest shown by the student in the subject

2nd enrollment exchange students will follow the same criteria described for second and subsequent enrollments.

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Exposition of contents by the teacher, analysis of competencies, explanation and demonstration of abilities, skills and knowledge in the classroom.
- M2 Group work sessions supervised by the teacher. Case study, diagnostic analysis, problems, field study, computer room, visits, data search, libraries, network, Internet, etc. Significant construction of knowledge through student interaction and activity.
- M3 Supervised monographic sessions with shared participation.
- M4 Application of interdisciplinary knowledge.
- M6 Personalized attention and in small groups. Period of instruction and/or orientation carried out by a tutor with the objective of reviewing and discussing the materials and topics presented in the classes, seminars, readings, completion of assignments, etc.
- M7 Set of oral and/or written tests used in the initial, formative or summative evaluation of the student.
- M8 Student study: Individual preparation of readings, essays, problem solving, seminars, papers, memoirs, etc. To expose or deliver in the theoretical classes, practical classes and/or small group tutorials. Work done on the university platform (www.plataforma.ucv.es).

- M9 Group preparation of readings, essays, problem solving, papers, memoirs, etc. To present or deliver in the theoretical classes, practical classes, seminars and/or small group tutorials. Work done on the university platform (www.plataforma.ucv.es).

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
Face-to-face class M1	R1, R3, R7, R8	24,00	0,96
Practice Classes M2	R1, R2, R3, R4, R5, R6, R7, R8, R9	20,00	0,80
Exhibition of group works M4	R1, R5, R7	4,00	0,16
Tutorial M6	R1, R3, R4, R5, R6, R7, R8, R9	8,00	0,32
Evaluation M7	R1, R3, R4, R5, R6, R7, R8	4,00	0,16
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
Student's self-employment M8	R1, R2, R3, R4, R5, R6, R7, R8, R9	75,00	3,00
Group work M9	R5, R7	15,00	0,60
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
UD 1. Introduction to ethics	<ul style="list-style-type: none">- Etymology and definition- Material and formal object- Ethical relativism
UD 2. The ethical dimension of the person	<ul style="list-style-type: none">- The person unity in being and unity in acting- Voluntary action- Action and omission- Freedom- Moral responsibility- Moral conscience
UD 3. Professional Ethics	<ul style="list-style-type: none">- The professions: characteristics, the end, ethics and corruption- Ethics in Nursing: evolution and principles
UD 4. College Organization and Code of Ethics	<ul style="list-style-type: none">- Professional associations- College Nursing Organization- Code of Ethics
UD 5. Patient information and informed consent	<ul style="list-style-type: none">- Legislative regulation: rights and duties- Deontological regulation
UD 6. Professional secret	<ul style="list-style-type: none">- Concept- Professional secret in the health field- Legislative and ethical regulations

UD 7. Professional responsibility

- Introduction to Law
- Professional recklessness
- Legal liability: criminal and civil

UD 8. Ethics Comittes

- Bioethics Committees of the Health Departments
- Research committees
- Ethics committees for drug research

UD 9. Conscientious objeten

- Concept and legal perspective
- Conscientious objection in the health field: proper and improper

-

UD 10. Ethical issues in biomedical research

- Historical review
- Codes, declarations and legislation
- Spanish Agency for Medicines and Health Products

UD 11. Humanization of healthcare

- Concept humanization - dehumanization
- Causes
- Main features of humanization
- Nursing and humanization
- Humaniza Projects

UD 12. Interprofessional relations

- Professional relationship
- Deontological regulation
- Legislative regulation

UD 13. Introduction to Bioethics

- Origin, definition and characterization
- Foundation
- Models

UD 14. Bioethics at the beginning of life

- Identity and status of the human embryo
- Main issues

UD 15. Bioethics at the end of life

- Medical care at the end of life
- Main issues

Temporary organization of learning:

Block of content	Number of sessions	Hours
UD 1. Introduction to ethics	3,00	6,00
UD 2. The ethical dimension of the person	2,00	4,00
UD 3. Professional Ethics	2,00	4,00
UD 4. College Organization and Code of Ethics	3,00	6,00
UD 5. Patient information and informed consent	2,00	4,00
UD 6. Professional secret	2,00	4,00
UD 7. Professional responsibility	3,00	6,00
UD 8. Ethics Comittes	1,00	2,00
UD 9. Conscientious objction	1,00	2,00
UD 10. Ethical issues in biomedical research	2,00	4,00
UD 11. Humanization of healthcare	2,00	4,00
UD 12. Interprofessional relations	1,00	2,00
UD 13. Introduction to Bioethics	2,00	4,00
UD 14. Bioethics at the beginning of life	2,00	4,00

UD 15. Bioethics at the end of life
