E24	To know the legislation that regulates nursery schools and their organization.				X

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	60,00%	Written test: Final summative or continuous theoretical and practical test (open questions, objective test questions, truncated exam, etc.). Preparation of fieldwork memorandums. Solution of case studies, single case, etc.
R1, R2, R3, R4	10,00%	Oral presentation of group and individual work.
R1, R2, R3, R4	10,00%	Individual monitoring of attendance at face-to-face sessions and active participation in theoretical and practical classes, seminars and tutorials.
R1, R2, R3, R4	20,00%	Non-final written exams: individual or group directed work.

Observations

The assessment includes several well differentiated instruments such as group work, individual work and the final written test which will include multiple-choice questions and short developmental-practical questions. The final grade will be the weighted average of the results obtained in each of them, provided that all of them have been passed with a minimum mark of 5. All assignments will have a specific date for completion and delivery. For those students who cannot attend class regularly (they must request special permission from their teacher within the first month of each semester) or do not meet the minimum percentage of attendance reported by the teacher (80%), an alternative work plan will be established with agreed tutorials. They will be assessed by means of a final test that combines developmental and practical questions in which they demonstrate the acquisition of the learning outcomes established in the subject's teaching guide (single assessment). They must also obtain a minimum score of 5 to pass the course. In all cases, a C1 level of Spanish is required.

In accordance with the regulations governing the evaluation and grading of the subject in force at the UCV, the mention of 'Distinction' may be awarded to students who have obtained a grade equal to or higher than 9.0. The number of 'Distinctions' may not exceed five percent of the students enrolled in the group in the corresponding academic year, unless the number of students enrolled is less than 20, in which case only one 'Distinction' may be awarded. Exceptionally, honours may be allocated between the different groups of the same subject as a whole. However, the total number of honours to be awarded will be the same as if they were assigned by group, but these may be

distributed among all students according to a common criterion, regardless of the group to which they belong. The criteria for awarding 'Honours' will be carried out according to the criteria stipulated by the lecturer responsible for the subject detailed in the 'Observations' section of the assessment system of the teaching guide.

CRITERIA FOR THE AWARDING OF HONOURS:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 PARTICIPATIVE MASTERCLASS
- M2 CLASSROOM PRACTICES
- M3 CASE STUDIES
- M6 PROBLEM-BASED LEARNING
- M7 GROUP TUTORING
- M8 INDIVIDUAL TUTORING
- M9 PROJECT-BASED LEARNING
- M10 COOPERATIVE AND COLLABORATIVE WORK
