Recommended knowledge

No prerequisites

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Propose resource adjustment plans and educational support planning for children with language development difficulties derived from sensory, cognitive, motor or environmental conditions
- R2 Plan intervention focused on the student with language development difficulties derived from sensory, cognitive, motor or environmental conditions to compensate and stimulate aspects of language development at the linguistic, communicative, cognitive, and social levels
- R3 Plan an educational intervention for these types of children focused on the school environment. Propose educational support measures applicable in the classroom by tutors and specialists. Propose measures aimed at the inclusion of these children

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

GENERAL	Weighting			
	1	2	3	4
CG3 Effectively address language learning scenarios in multicultural and multilingual contexts. Promote reading and critical analysis of texts from various scientific and cultural domains included in the school curriculum.			X	
CG4 Design and regulate learning spaces in diverse contexts that address gender equality, equity, and respect for human rights, which form the values of citizenship education.				X
CG5 Promote a positive coexistence inside and outside of the classroom, resolve discipline issues, and contribute to peaceful resolution of conflicts. Encourage and value effort, perseverance, and personal discipline in students.			X	
CG6 Know the organization of primary education schools and the diversity of actions involved in their functioning. Perform tutoring and orientation with students and their families, addressing the singular educational needs of the students. Recognize that the exercise of the teaching function must go on improving and adapting to the scientific, pedagogical, and social changes throughout life.				X
CG10 Reflect on classroom practices to innovate and improve teaching work. Acquire habits and skills for autonomous and cooperative learning and promote it among students.				X
CG11 Know and apply information and communication technologies in the classrooms. Selectively discern audiovisual information that contributes to learning, civic education, and cultural enrichment.				X
CG12 Understand the function, possibilities, and the limits of education in today's society and the fundamental competencies that affect primary education schools and their professionals. Know the models of quality improvement applied to educational institutions.			X	

SPECIFIC	Weighting			
	1	2	3	4
EAL4 Analyse the type of strategies, methodologies and procedures appropriate to the personal and social constraints of the learner: child-centred or environment-centred.				X
EAL5 Select and apply the appropriate intervention strategies in each case and at each evolutionary moment in order to favour the integration of students with specific support needs and their integral development.				X
EAL6 To understand one's own action in terms of collaboration with the other agents involved with the pupils in order to apply the appropriate strategies in the educational framework.				X

Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R2, R3	10,00%	Solution of practical cases: Execution tests, real and/or simulated tasks.
R1, R2, R3	20,00%	Oral presentation of group and individual works: Self-assessment systems (oral, written, individual, in groups). Oral tests (individual, in groups, presentation of topics or works).
R1, R2, R3	10,00%	Monitoring of student work in non-face-to-face/distance sessions: Observation techniques, rubrics, checklists. Portfolios.
R1, R2, R3	10,00%	Active participation in theoretical-practical sessions, seminars, and tutorials: Attitude scale (to gather opinions, values, social and managerial skills, interaction behaviors).
R1, R2, R3	40,00%	Written tests: Objective tests with short and extended responses.
R1, R2, R3	10,00%	Projects. Development and/or design works.

Observations

The evaluation includes several well differentiated instruments. The final grade will be the weighted average of the results obtained in each of them, provided that the written test has been passed with a minimum grade of 5. This written test consists of a section with 30-40 multiple choice questions and the development of a case. In order to pass the course, it is necessary to demonstrate in all oral and written productions an advanced level of linguistic proficiency, so as to achieve at the end of the degree the C1 level, as required by the official Memory of the degree. Therefore, each spelling mistake will be, consequently, penalized in papers and exams with 0.50 points. Three missing accents will be equivalent to one spelling mistake. Failure to comply with the rules and deadlines established for the completion of academic activities may invalidate the grade of the same.

Single evaluation: Exceptionally, this evaluation system may be applied to those students who, in a justified and accredited way, cannot submit to the students who, in a justified and accredited way, cannot submit to the continuous evaluation system and request it to their professor within the first month of each semester. In this case, they will be evaluated in the following way: written test,

delivery of activities, participation in the forum and oral presentation. The Dean's Office of the Faculty will decide on the admission of the student's request for a single evaluation of the student. Criteria for the awarding of Honor Grades: After obtaining a 9 and provided that the result obtained is the result of an excellent academic achievement combined with an effort and interest in the subject..

CRITERIA FOR THE AWARDING OF HONOURS:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Participatory Master Class
- M2 Case Study
- M3 Project-based Learning
- M5 Seminar Work
- M6 Problem-based Learning
- M7 Cooperative/Collaborative Work
- M9 Group and Individual Tutoring

- M10 Individual Tutoring
- M11 Participatory Master Class
- M12 Case Study
- M13 Seminar Work
- M15 Project-based Learning
- M17 Problem-based Learning
- M18 Cooperative/Collaborative Work
- M19 Individual Tutoring
- M20 Group and Individual Tutoring
