Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R2, R3, R4	40,00%	Solution of practical cases: Execution tests, real and/or simulated tasks.
R1, R5	20,00%	Oral presentation of group and individual works: Self-assessment systems (oral, written, individual, in groups). Oral tests (individual, in groups, presentation of topics or works).
R2, R3, R4	40,00%	Written tests: Objective tests with short and extended responses.

Observations

EVALUATION:

- 1) Written exam (final and summative test) = 20%.** This consists of different written exercises by which students will fulfil the requirements of R1, R3 and R4.
- 2) Portfolio (coursework) = 20%.** This consists of written assignments by which students will fulfil the requirements of R3.
- 3) Listening test (non-final written test) = 20%.** This consists of various multiple choice or short answer items by which students will fulfil the requirements of R2 and R3 .
- 4) Dictation test (non-final written test) = 20%.** This consists of listening to and writing down 10 sentences by which students will fulfil the requirements of R2 and R3.
- 5) Speaking exam (final oral test) = 20%.** (*) This consists of 3 tasks that involve reading aloud: one whole text, two extracts and a list of words by which students will fulfil the requirements of R2, R4 and R5. (*) A minimum mark of 50% is required in this exam to pass the subject overall.

SINGLE ASSESSMENT:

A student who is unable to attend any of the classes or whose class attendance is below 80% will take a single summative assessment that is worth 100% of the final grade for the subject. This exam will consist of the following parts: written (50% of the overall mark); listening (20%), dictation (20%) and speaking (20%). The tasks in the summative assessment fulfil the requirements of R1, R2, R3, R4 and R5.

USE OF ARTIFICIAL INTELLIGENCE (AI):

Students **may** use AI to:

- Resolve doubts about tasks- Assist learning (alternative explanations or self-assessment exercises)- Search for alternative resources and references for study

Students **may not** use AI to:

- Record or transcribe, in whole or in part, any activity carried out in the classroom in order to obtain summaries or notes made by AI- Generate text for inclusion in assessed tasks- Present work generated by AI as their own- Provide AI with statements, exercises or assessment tests to obtain automatic answers- Revise and improve the written expression of texts that students have written themselves

Citation and acknowledgment criteria:

- In any assessed tasks, students must indicate where AI has been used, which type of AI was used and what it was used for (such as, consulting information sources, style analysis, expansion of knowledge, etc.)

CRITERIA FOR THE AWARDING OF HONOURS:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.
