Recommended knowledge

No prior knowledge required

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Explain rationally the basic anatomical and physiological elements of the human voice as a musical instrument and apply them in vocal practice
- R2 Select vocal repertoire and appropriate auditory and audiovisual didactic material for the Primary stage, from different cultural areas
- R3 Actively participate in the design, interpretation, and didactic application of individual and collective musical expressions, with varied didactic resources suitable for Primary Education
- R4 Apply basic gestures and resources for directing the musical group
- R5 Identify the basic musical elements by ear

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

GENERAL	Weighting			
	1	2	3	4
CG1 Understand the curricular areas of Primary Education, the interdisciplinary relationship between them, the evaluation criteria, and the body of didactic knowledge around the respective teaching and learning procedures.				X
CG2 Design, plan, and evaluate teaching and learning processes, both individually and in collaboration with other teachers and professionals from the school.				X
CG5 Promote a positive coexistence inside and outside of the classroom, resolve discipline issues, and contribute to peaceful resolution of conflicts. Encourage and value effort, perseverance, and personal discipline in students.			X	
CG10 Reflect on classroom practices to innovate and improve teaching work. Acquire habits and skills for autonomous and cooperative learning and promote it among students.				X
CG11 Know and apply information and communication technologies in the classrooms. Selectively discern audiovisual information that contributes to learning, civic education, and cultural enrichment.			X	
SPECIFIC	Weighting			
	1	2	3	4
EM3 Acquire resources to encourage participation in activities, valuing musical experiences in a positive way within the framework of an active and participative didactic, inside and outside the school.				X
EM5 Affective experience of music, promoting metric precision, rhythmic sense and coordination of body movements.				X
EM7 To acquire the technical vocal and instrumental training that will enable them to create, select and direct globalising musical activities in the classroom.				X

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R3, R4, R5	5,00%	Solution of practical cases: Execution tests, real and/or simulated tasks.
R1, R3, R4	20,00%	Oral presentation of group and individual works: Self-assessment systems (oral, written, individual, in groups). Oral tests (individual, in groups, presentation of topics or works).
R1, R2, R3, R4, R5	5,00%	Monitoring of student work in non-face-to-face/distance sessions: Observation techniques, rubrics, checklists. Portfolios.
R2, R3, R4, R5	20,00%	Active participation in theoretical-practical sessions, seminars, and tutorials: Attitude scale (to gather opinions, values, social and managerial skills, interaction behaviors).
R1, R5	25,00%	Written tests: Objective tests with short and extended responses.
R1, R2, R3, R4, R5	25,00%	Projects. Development and/or design works.

Observations

The course assessment will be organized by assignment/project, with a minimum grade of 5 required for each assignment to be determined. All assignments will have a completion and submission date that must be adhered to.

The above assessment systems will be integrated into the following assessment blocks:

Case study solutions: 30%. Linked to learning outcomes R1, R2, R3, R4, and R5. It will be assessed using the platform's specific tasks.Oral presentation of group and individual work: 30%. Submit the videos and audio clips provided on the platform that demonstrate the acquired skills. Linked to learning outcomes R1, R2, R3, R4, and R5. It will be assessed using the platform's specific tasks.Written assignments and tests: 30% Design of teaching proposals and questionnaires on theoretical aspects. Linked to learning outcomes R1, R2, R3, R4, R5. It will be assessed using specific platform assignments.Monitoring of student work in non-face-to-face/distance sessions: 10%. Establish a minimum of 4 personalized tutorials. Linked to learning outcomes R1, R2, R3, R4, R5. It will be assessed using specific platform assignments.

Single assessment:

Students who cannot attend the continuous assessment system by attending at least 80% of classes will be eligible for this assessment system. In this case, communication with the professor for follow-up will be essential. During this monitoring, the professor will schedule partial and final submissions, if necessary. In the case of this assessment method, the RAs and the percentage of assignments required to achieve them will be the same as in the face-to-face format. All students involved must appear in person on the official exam date set by the Dean's Office.

Use of Artificial Intelligence: The use of Artificial Intelligence tools is permitted to support study, for example, to generate alternative explanations, summaries, concept maps, or self-assessment exercises. Its use is also authorized to improve the clarity and coherence of self-created texts, or to receive feedback on them. In all cases, students must report their use of AI platforms, citing the tools used in the corresponding references section. However, under no circumstances will Artificial Intelligence be permitted to replace students' personal work and effort in completing assignments and submissions that demonstrate the Learning Outcomes (LO) required for knowledge acquisition.

CRITERIA FOR THE AWARDING OF HONOURS:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with 9 Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.
