

Information about the subject

Degree: Bachelor of Science Degree in Dentistry

Faculty: Faculty of Medicine and Health Sciences

Code: 480206 **Name:** General Medical-Surgical Pathology

Credits: 6,00 **ECTS Year:** 2 **Semester:** 2

Module: Module 3: General Medical-Surgical Pathology and Therapeutics

Subject Matter: GENERAL MEDICAL-SURGICAL PATHOLOGY **Type:** Compulsory

Field of knowledge: Health Sciences

Department: Surgical Specialities

Type of learning: Classroom-based learning

Languages in which it is taught: English, Spanish

Lecturer/-s:

482A	<u>Jose Alberto Lopez Baeza</u> (Responsible Lecturer)	lopez.baeza@ucv.es
482GIQ	<u>Julia Martin Jaramago</u> (English Responsible Lecturer)	julia.martin@ucv.es
	<u>Gustavo Jesus Fabregat Cid</u>	gustavo.fabregat@ucv.es
	<u>Lucrecia Maria Blasco González</u>	lm.blasco@ucv.es

Module organization

Module 3: General Medical-Surgical Pathology and Therapeutics

Subject Matter	ECTS	Subject	ECTS	Year/semester
GENERAL MEDICAL-SURGI CAL PATHOLOGY	18,00	Anaesthesiology	6,00	2/1
		General Medical-Surgical Pathology	6,00	2/2
		Medical-Surgical Specialities	6,00	2/2
MEDICAL PATHOLOGY	12,00	General and Dental Pharmacology	6,00	2/1
		Pathological Anatomy	6,00	2/1

Recommended knowledge

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

R1 Detects and understands the main mechanisms that cause medical and surgical diseases

R2 Adequately identifies the main clinical manifestations of the disease.

R3 Knows the methodology of clinical examination of patients.

R4 The student can optimize the diagnostic means, personalizing them for each identified clinical situation and updating them.

R5 The student can establish a diagnostic judgement from the anamnesis and examination data and record them.

R6 Identifies and interprets the main clinical manifestations of vital complications in patients.

R7 The student is able to handle emergency situations.

R8 The student is able to diagnose the main pathologies of the throat, nasal cavities and ear related to dentistry, especially malignant tumour pathology.

R9 The student is capable of searching bibliographic information from different sources and knows how to analyze it with a critical spirit.

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Takes a correct clinical history.
- R2 Distinguishes the signs of organic functioning.
- R3 Detects and understands the main mechanisms that cause medical and surgical diseases
- R4 Adequately identifies the main clinical manifestations of the disease.
- R5 Knows the methodology of clinical examination of patients.
- R6 The student can optimize the diagnostic means, personalizing them for each identified clinical situation and updating them.
- R7 The student can establish a diagnostic judgement from the anamnesis and examination data and record them.
- R8 The student is able to establish a reasoned and updated therapeutics from the established diagnostic judgments.
- R9 The student is able to have a continuous training program, based on bibliographic sources.
- R10 Develops capacity to relate to patients and communicates effectively.
- R11 Proves knowledge of the principles governing surgical activity.
- R12 Proves knowledge of the mechanisms of pain transmission.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

GENERAL	Weighting			
	1	2	3	4
CG2 I bOrganizational and planning skills			X	

SPECIFIC	Weighting			
	1	2	3	4
CE A 7 Promote autonomous learning of new knowledge and techniques, as well as motivation for quality.				X
CE B 1 Understand the basic biomedical sciences on which dentistry is based to ensure proper oral care.				X
CE B 14 Know about general disease processes, including infection, inflammation, immune system disorders, degeneration, neoplasm, metabolic disorders and genetic disorders.				X
CE B 1 Be familiar with the general pathological features of diseases and disorders affecting organ systems, specifically those with oral impact.				X
CE B 1 Understand the fundamentals of action, indications and efficacy of drugs and other therapeutic interventions, knowing their contraindications, interactions, systemic effects and interactions on other organs, based on available scientific evidence.		X		
CE B 1 Know, critically evaluate and know how to use clinical and biomedical information sources to obtain, organize, interpret and communicate scientific and health information.				X
CE B 1 Know the scientific method and have the critical capacity to value the established knowledge and the new information. Be able to formulate hypotheses, collect and critically evaluate information for the resolution of problems, following the scientific method.		X		

TRANSVERSAL	Weighting			
	1	2	3	4
1. a. Analysis and synthesis skills				x
1. b. Organizational and planning capacity			x	
1. c. Oral and written communication in the native language.			x	
1. d. Knowledge of a foreign language			x	
1. e. Computer skills	x			
1. f. Information management capacity	x			
1. g. Problem solving		x		
1. h. Decision making		x		
2. i. Teamwork			x	
2. l. Interpersonal skills			x	
2. n. Critical Reasoning		x		
3. p. Autonomous learning				x
3. q. Adaptation to new situations		x		
3. r. Creativity		x		
3. s. Leadership			x	
3. u. Initiative and entrepreneurship		x		
3. v. Motivation for quality			x	
3. w. Sensitivity to environmental and socio-health issues		x

Course guide

Year 2025/2026

480206 - General Medical-Surgical Pathology

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
	75,00%	MULTIPLE CHOICE TEST: Multiple choice test with one correct answer. This shows to greater extent the contents acquired by the student.
	10,00%	PRESENTATION: The student develops by means of an oral presentation, supported with audio-visual materials, a theme or topic given by the teacher. At the end of the presentation, the teacher or audience may ask questions.
	0,00%	PRESENTATION: The student develops by means of an oral presentation, supported with audio-visual materials, a theme or topic given by the teacher. At the end of the presentation, the teacher or audience may ask questions.
	5,00%	CLASS PARTICIPATION: The teacher assesses the participation, involvement and progress the student makes in acquiring knowledge and skills in theory and practical classes and seminars. This is never more than 5% of the final grade.
	0,00%	CLASS PARTICIPATION: The teacher assesses the participation, involvement and progress the student makes in acquiring knowledge and skills in theory and practical classes and seminars. This is never more than 5% of the final grade.
	10,00%	PRACTICAL EXAM: The student carries out a test in which he/she must show by means of practical application the acquisition of certain knowledge. For example, histological or anatomopathological diagnoses, interpretation of images or diagnostic tests.

Observations

- Test exam 75%. Obligatory. It is necessary to have it approved to pass the subject.

- Group Project 10%. Presentation on the day assigned at the beginning of the subject. Justification is only valid for non-presentation on the indicated day with the same reasons as for changing the exam date according to UCV academic regulations and the professor will assign another presentation date.

- Attendance at theoretical classes 5%.

- Practical session 10%. Obligatory attendance. It only serves justification with the same reasons as for changing the exam date according to UCV academic regulations. If the absence is not justified, it must be submitted directly to 2nd call.

- Students who do not have the minimum attendance at theoretical classes, do not do Group Project or do not attend Practical session and go to 2nd call, that percentage will not be counted in the final grade. Students who have not attended practical session and are going to 2nd call must submit a written work on the day of 2nd call exam. Students who have not attended practical session and going to 2nd call and not submit written work must course the subject the following year and do the practical session.

- Students who have failed the subject from the previous year, the grade for class attendance, group projects and practices is saved from one year to the next. Students that have not done a group project or the practice, they must do it. Remember that attendance at the practice is necessary to pass the subject.

In this subject, the possibility of a single assessment is not considered, as the mandatory completion of practical activities with active student participation is required.

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Lecture.
 Problem Solving.
 Explanation of contents by the teacher.
 Explanation of knowledge and skills.
- M2 Practical basic sciences laboratory sessions, practical
 simulation laboratory sessions, virtual hospital and
 dissecting room.
- M6 Discussion and problem solving.
- M13 Personal preparation of written texts, essays, problem solving, seminars.
- M15 Personalised Attention. Period of instruction and/or guidance carried out by a tutor with
 the aim of analysing with the student his/her work, activities and evolution in learning of
 subjects.

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
THEORY CLASS M1, M6, M13	R1, R2, R3, R4	40,00	1,60
TUTORING M1, M6, M13	R1, R2, R3, R4	2,00	0,08
EVALUATION M1, M2, M6, M13	R1, R2, R3, R4	2,00	0,08
PRACTICAL CLASS M2	R2, R3, R4	14,00	0,56
TOTAL		58,00	2,32

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
INDIVIDUAL WORK M1, M2, M6, M13	R1, R2, R3, R4	60,00	2,40
GROUP WORK M1, M2, M6, M13	R2, R3, R4	32,00	1,28
TOTAL		92,00	3,68

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
Pathogenesis	Description of the main pathogenic mechanisms
Cardiovascular pathology	Pathophysiological mechanisms and manifestations of cardiovascular diseases
Respiratory pathology	Pathophysiological mechanisms and manifestations of respiratory disease.
Nephrourological pathology	Pathophysiological mechanisms and manifestations of nephrourological disease.
Digestive pathology	Pathophysiological mechanisms and manifestations of digestive disease
Hematological pathology	Pathophysiological mechanisms and manifestations of hematological disease.
Musculoskeletal system pathology	Pathophysiological mechanisms and manifestations of muscle and bone disease.
Metabolic and endocrinological pathology	Physiopathological mechanisms and manifestations of metabolic and endocrinological disease.
Nervous system pathology	Pathophysiological mechanisms and manifestations of central and peripheral nervous system disease.
Inflammatory response and pain	Description of the inflammatory /reparative process. Pathophysiology of pain.
Infectious pathology	Pathophysiological mechanisms and manifestations of infectious disease.
Oncological pathology	Pathophysiological mechanisms and manifestations of oncological disease.

Temporary organization of learning:

Block of content	Number of sessions	Hours
Pathogenesis	4,00	8,00
Cardiovascular pathology	4,00	8,00
Respiratory pathology	3,00	6,00
Nephrourological pathology	2,00	4,00
Digestive pathology	2,00	4,00
Hematological pathology	2,00	4,00
Musculoskeletal system pathology	2,00	4,00
Metabolic and endocrinological pathology	2,00	4,00
Nervous system pathology	2,00	4,00
Inflammatory response and pain	2,00	4,00
Infectious pathology	2,00	4,00
Oncological pathology	2,00	4,00
