Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- Proves to be competent in educating patients and carrying out a complete primary care in patients of all ages and conditions; which emphasizes the current concepts of prevention and treatment of oral diseases and supports the need for the maintenance of systemic and oral health.
- R2 Proves to be competent in the diagnosis of cariogenic and non-caryogenic dental pathology, including pulp and periradicular pathology in patients of all ages and conditions.
- R3 Proves to be competent in diagnosing the need to restore or replace teeth in order to provide acceptable shape, function and esthetics in patients of all ages and conditions.
- R4 Proves to be competent at diagnosing and preventing malocclusions in the primary, mixed or permanent dentition in patients of all ages and conditions.
- R5 Manages integral treatments in the infant patient.
- R6 Shows abilities for management of the pediatric patient's behavior.
- R7 Carries out a comprehensive treatment plan for the paediatric patient.
- R8 Manages integral treatments in the infant patient.

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
	30,00%	MULTIPLE CHOICE TEST: Multiple choice test with one correct answer. This shows to greater extent the contents acquired by the student.
	30,00%	PRACTICUM REPORT
	40,00%	EXTERNAL TUTOR EVALUATION REPORT

Observations

ATTENDANCE:

The total number of clinical practices and clinical sessions in "Integral del Niño" is 35 each. Attendance is mandatory at 90% (32). Students are allowed to be absent for a maximum of 3 justified clinical practices and/or clinical sessions in total. Absences can only be justified with the same reasons stated in the UCV statutes for rescheduling exams. If the maximum number of allowed justified absences is exceeded, students must directly attend the 2nd examination period. To access the 2nd examination period, the student must not exceed 3 justified absences or have more than 1 unjustified absence. If this limit is exceeded, the student will have to retake the subject next year. Students are obligated to comply with the UCV clinical regulations regarding attire, facility care, and behavior. Failure to comply will result in a penalty/expulsion from the practice. Students must possess the necessary linguistic competencies for patient care during clinical practices. EVALUATION: 30% Multiple-choice questions. An exam with 40 multiple-choice questions, each having 4 options with only one correct answer. One incorrectly answered question deducts 0.25 from a correctly answered question. A minimum score of 5 is required to calculate the average.40% Clinical Practice Report, to be submitted in two parts, the first in January and the second in June. A final grade of 6 is necessary to calculate the average.30% Tutor's Report. A final grade of 6 is necessary to calculate the average. SECOND REGISTRATION STUDENTS: Second registration students must retake the entire subject, including clinical practices and clinical sessions.

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

M3	Problem and case solving. Social action activities.
M4	Group work with research, discussion and filtering information about the degree subjects.
M6	Discussion and problem solving.
M8	Oral presentations by students.
M9	Group work: group work sessions supervised by the teacher. Knowledge building through interaction and activity of students.
M10	Carrying out bibliographic reviews and practical work experience dissertations.
M11	Practical in-person classes in clinics linked to the university, where the student will carry out different treatments under direct supervision from the assigned tutor.
M12	Seminars, supervised monographic classes with shared participation.
M13	Personal preparation of written texts, essays, problem solving, seminars.

Year 2025/2026 480503 - Child Comprehensive Dentistry

M14 Clinical study and problem and case solving through Dentistry based on scientific evidence.

M15 Personalised Attention. Period of instruction and/or guidance carried out by a tutor with the aim of analysing with the student his/her work, activities and evolution in learning of subjects.
