

Information about the subject

Degree: Bachelor of Science Degree in Dentistry

Faculty: Faculty of Medicine and Health Sciences

Code: 481204 **Name:** Modern language: Spanish

Credits: 6,00 **ECTS Year:** 2 **Semester:** 2

Module: Module 1: Relevant Basic Biomedical Sciences in Dentistry

Subject Matter: MODERN LANGUAGE **Type:** Basic Formation

Field of knowledge: Health Sciences

Department: Language and Literature

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

482GIQ Beatriz Rodenas Tolosa (**English Responsible Lecturer**)

beatriz.rodendas@ucv.es

Module organization

Module 1: Relevant Basic Biomedical Sciences in Dentistry

Subject Matter	ECTS	Subject	ECTS	Year/semester
HUMAN ANATOMY	12,00	Embryology and General Anatomy I	6,00	1/1
		General Anatomy II and Oral Anatomy	6,00	1/2
Biology	18,00	Biology	6,00	1/1
		Histology	6,00	1/2
		Microbiology	6,00	1/2
Physiology	6,00	Human and Oral Physiology	6,00	1/2
Biochemistry	6,00	Biochemistry	6,00	1/1
MODERN LANGUAGE	12,00	Modern Language: English	6,00	2/2
		Modern language: Spanish	6,00	2/2

Recommended knowledge

No set requirements, but grammatical knowledge and oral skills at B1 level are required

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Asks about the body: describe problems and talk about symptoms in English.
- R2 Writes a report/reference letter in English.
- R3 Gives instructions in English.
- R4 Writes a medical history in English.
- R5 Explains treatment in English.
- R6 Present medical data in English.
- R7 Understands the main points of a scientific article in English and understand its logical structure.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB1	Students demonstrate knowledge and understanding in an area of study that is at the core of general secondary education, and is often at a level that, while supported by advanced textbooks, also includes some aspects that involve knowledge from the cutting edge of their field of study.				X
CB2	Know how to apply their knowledge to their work or vocation in a professional way and possess the skills that are usually demonstrated through the elaboration and defense of arguments and the resolution of problems within their area of study.				X
CB3	Have the ability to gather and interpret relevant data (usually within their area of study) to make judgments that include reflection on relevant social, scientific or ethical issues.				X
CB4	Students should be able to convey information, ideas, problems and solutions to both specialized and non-specialized audiences.				X

GENERAL		Weighting			
		1	2	3	4
CG10	FWork in a multidisciplinary team				X
CG1	I aCapacity for analysis and synthesis				X
CG11	FWork in an international context				X
CG2	I bOrganizational and planning skills				X
CG3	I cOral and written communication in the native language				X
CG13	FRecognition of diversity and multiculturalism				X

CG4 I dKnowledge of a foreign language				X
CG14 FCritical Reasoning			X	
CG15 FEthical commitment			X	
CG6 I fInformation management capacity				X
CG7 I gProblem solving				X
CG8 I hDecision making				X
CG9 P iTeamwork				X

SPECIFIC	Weighting			
	1	2	3	4
CE A 1 Know the essential elements of the dental profession, including ethical principles and legal responsibilities.			X	
CE A 2 Understand the importance of such principles for the benefit of the patient, society and the profession, with special attention to professional secrecy.			X	
CE A 3 Identify the patient's concerns and expectations, as well as to communicate effectively and clearly, both orally and in writing, with patients, relatives, the media and other professionals.				X
CE A 4 Understand and recognize the social and psychological aspects relevant to the treatment of patients.			X	
CE A 5 Know how to apply the principles of anxiety and stress management to oneself, to patients and to other members of the dental team.			X	
CE A 6 Understand the importance of developing a professional practice with respect to patient autonomy, beliefs and culture.		X		
CE A 7 Promote autonomous learning of new knowledge and techniques, as well as motivation for quality.				X
CE A 8 Know how to share information with other health professionals and to work as a team.				X

CE A 9 Understand the importance of maintaining and using records with patient information for subsequent analysis, preserving the confidentiality of the data.	X		
CE A 10 Know and identify the psychological and physical problems derived from gender violence in order to train students in the prevention, early detection, assistance, and rehabilitation of the victims of this form of violence.		X	
CE B 11 Understand the basic biomedical sciences on which dentistry is based to ensure proper oral care.	X		
CE B 12 Understand and recognize the normal structure and function of the stomatognathic system, at the molecular, cellular, tissue and organic level, in the different stages of life.	X		
CE B 13 Understand and recognize the science of biomaterials essential for dental practice as well as the immediate management of possible allergies to them.	X		
CE B 14 Know about general disease processes, including infection, inflammation, immune system disorders, degeneration, neoplasm, metabolic disorders and genetic disorders.	X		
CE B 15 Be familiar with the general pathological features of diseases and disorders affecting organ systems, specifically those with oral impact.		X	
CE B 16 Understand the fundamentals of action, indications and efficacy of drugs and other therapeutic interventions, knowing their contraindications, interactions, systemic effects and interactions on other organs, based on available scientific evidence.	X		
CE B 17 Understand and recognize the principles of ergonomics and safety at work (including control of cross-infection, radiation protection and occupational and biological diseases).		X	
CE B 18 Know, critically evaluate and know how to use clinical and biomedical information sources to obtain, organize, interpret and communicate scientific and health information.			X
CE B 19 Know the scientific method and have the critical capacity to value the established knowledge and the new information. Be able to formulate hypotheses, collect and critically evaluate information for the resolution of problems, following the scientific method.			X

TRANSVERSAL	Weighting			
	1	2	3	4
1. a. Analysis and synthesis skills				X
1. b. Organizational and planning capacity				X
1. c. Oral and written communication in the native language.				X
1. d. Knowledge of a foreign language				X
1. e. Computer skills				X
1. f. Information management capacity				X
1. g. Problem solving				X
1. h. Decision making			X	
2. i. Teamwork				X
2. j. Multidisciplinary teamwork				X
2. k. Work in an international context				X
2. l. Interpersonal skills				X
2. m. Recognition of diversity and multiculturalism				X
2. n. Critical Reasoning			X	
2. o. Ethical commitment			X	
3. p. Autonomous learning				X
3. q. Adaptation to new situations				X
3. r. Creativity				X

Course guide

Year 2025/2026
481204 - Modern language: Spanish

3. s.	Leadership			x
3. t.	Knowledge of other cultures and customs			x
3. u.	Initiative and entrepreneurship		x	
3. v.	Motivation for quality			x
3. w.	Sensitivity to environmental and socio-health issues		x	

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
	40,00%	OPEN QUESTIONS: Written exam in which basic theory knowledge and the ability to relate, integrate and coherently express it in writing is assessed.
	10,00%	ORAL TEST: Oral exam in which the student answers the questions the teacher asks, verbally explaining the contents acquired, allowing for interaction with the teacher.
	30,00%	PRESENTATION: The student develops by means of an oral presentation, supported with audio-visual materials, a theme or topic given by the teacher. At the end of the presentation, the teacher or audience may ask questions.
	15,00%	ASSIGNMENTS: The student, either individually or in a group, develops a theme which reviews or researches, and he/she presents it, in writing, for assessment by the teacher.
	5,00%	CLASS PARTICIPATION: The teacher assesses the participation, involvement and progress the student makes in acquiring knowledge and skills in theory and practical classes and seminars. This is never more than 5% of the final grade.

Observations

1. It is compulsory to obtain 25% over 40% in the written test to pass the course. If this 25% is not obtained, the remaining marks will not be taken into account. 2. It is compulsory to obtain 50% in the oral tests to pass the course (or 20% over 40%). Only by obtaining this 50% will each part of the evaluation be taken into account. 3. It is compulsory to obtain 50% in the written assignments to pass the course (or 7,5% over 15%). Only by obtaining this 50% will each part of the evaluation be taken into account. 4. 5% of the overall grade is obtained for participation and attendance in the classroom. This 5% will be discounted following 3 unjustified absences. 5. NO MARKS ARE RETAINED FOR THE FOLLOWING ACADEMIC YEAR. 6. This subject does not include the possibility of a single assessment, due to the compulsory performance of practical activities with active student participation. MENTION OF DISTINCTION: In accordance with the

regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

MENTION OF DISTINCTION:

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded. Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- | | |
|----|--|
| M1 | Lecture.
Problem Solving.
Explanation of contents by the teacher.
Explanation of knowledge and skills. |
| M5 | Problem and case solving. Written tasks.
Online activity on the e-learning platform.
Personal study.
Compiling information and documentation. |

M8	Oral presentations by students.
M9	Group work: group work sessions supervised by the teacher. Knowledge building through interaction and activity of students.
M13	Personal preparation of written texts, essays, problem solving, seminars.
M15	Personalised Attention. Period of instruction and/or guidance carried out by a tutor with the aim of analysing with the student his/her work, activities and evolution in learning of subjects.

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
THEORY CLASS M1, M5, M8, M9	R1, R2, R3, R4	56,00	2,24
TUTORING M1, M5, M8, M9	R1, R3, R4	2,00	0,08
EVALUATION M5, M8, M9	R1, R2, R3, R4	2,00	0,08
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
INDIVIDUAL WORK M1, M5, M8	R1, R2, R4	60,00	2,40
GROUP WORK M9	R1, R4	30,00	1,20
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
BLOQUE DE CONTENIDOS TEÓRICOS	Specific contents in the field of Health and Dentistry:1. THE DENTAL CLINIC AND THE HEALTH PROFESSIONALS 2. COMMUNICATION WITH THE PATIENT3. ORAL ANATOMY4. ORAL PATHOLOGIES5. ORAL PREVENTION AND TREATMENT OF PAIN6. SPECIALITIES IN DENTISTRY; DEFINITION OF DENTAL CONCEPTS
ORAL EXPOSITIONS	1. STRUCTURE OF ACADEMIC PROJECTS2. EXPRESSIONS AND CONNECTORS IN SCIENTIFIC ENGLISH3. COMMON PATHOLOGIES OF THE ORAL CAVITY4. RESEARCH WEBPAGES5. SPECIALITIES IN DENTISTRY6. ONLINE DICTIONARIES IN HEALTH SCIENCES
WRITTEN WORK	WRITTEN WORK ON RESEARCH PROJECTS VANCOUVER STYLE BIBLIOGRAPHIC REFERENCES

Temporary organization of learning:

Block of content	Number of sessions	Hours
BLOQUE DE CONTENIDOS TEÓRICOS	22,00	44,00
ORAL EXPOSITIONS	6,00	12,00
WRITTEN WORK	2,00	4,00
