Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1, R4	60,00%	Oral and/or written tests employed in initial, training and/or summative student assessment.
R1, R2, R3, R4	20,00%	Presentation of practical activities.
R1, R2, R3, R4	20,00%	Attendance and active participation: lessons, group assignments and tutoring sessions. It will be monitored and registered by the teacher.

Observations

INFORMATION NOTE ON THE FINAL EVALUATION TEST A written exam will be carried out with multiple choice questions that may be combined with practical or development assumptions. Under adequate justification it could be replaced by an oral test.

CRITERIA FOR PASSING THE SUBJECT To pass the subject, the student must separately pass the different evaluation systems (attendance and active participation, practices and exam). Students who have been absent for a justified and accredited reason and who cannot participate in at least 50% of the sessions will have the right to a single alternative assessment, which they must request from the relevant lecturer with the necessary documentation. This alternative assessment will include a written exam, practical work and other tasks, oral and/or written, which the teacher considers appropriate to demonstrate the student's acquisition of competences developed in the classroom.

CRITERIA FOR THE USE OF ARTIFICIAL INTELLIGENCE (AI) Students must make ethical use of AI, bearing in mind that they may use it for consultation purposes only, and must always cite the purpose for which it has been used. AI must not be used to record or transcribe any lecture material, nor to perform tasks for which students are responsible according to the teacher's guidelines.

CRITERIA FOR THE GRANT OF HONOR REGISTRATION

It is granted as a sign of academic exceptionality and with restrictions as to the amount per number of students legally established.

The grant is subject to the professor's discretion. The student who opts for it would have been qualified a minimum grade in the subject of 9.5 points and would have demonstrated his academic excellence throughout the development of the subject, in the different planned activities and in the different evaluation processes.

Online teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R4	80,00%	Final evaluation consisting of essay questions and hypothetical scenarios.
	0,00%	Submitted tasks
	0,00%	Periodical assessment through questionnaires
R1, R2, R3, R4	20,00%	Attendance and participation in synchronic communication activities.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities
