Recommended knowledge

It is recommended to have acquired the skills established in the subject of Fundamentals and Data Analysis

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Building a work team in order to practically apply the knowledge acquired through the presential activities and individual work.
- R2 Acquiring a correct mental representation of the theoretical-practical contents of the module.
- R3 Working in groups in order to carry out different practical activities such as the creation and application of a test in order to measure and psychological construct.
- R4 Obtaining and organizing information from different sources (journals, books, videos, Internet) in order to create a test or for other purposes.
- R5 Using specific software for the resolution of problems related to the contents of the module.
- R6 Assessing the different quality criteria of a psychological test.
- R7 Understanding the importance of the information offered in a test's manual and using it correctly.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

SPECIFIC		Weighting

Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R2, R3, R5, R6, R7	60,00%	Oral and/or written tests employed in initial, training and/or summative student assessment.
R1, R2, R3, R4, R5, R6, R7	10,00%	Attendance and active participation: lessons, group assignments and tutoring sessions. It will be monitored and registered by the teacher.
R2, R3, R5, R6	30,00%	Group assignments.

Observations

Notes: The written exam will consist of a theoretical and a practical part. The form provided by the teacher and a calculator with statistical functions will be used to perform this test. In order to pass the course the student must pass the different evaluation systems (written exam, attendance and active participation and group work) separately. **Criteria for the award of honors:** Earn 9.0 points or higher and evidence levels of excellence in all competencies and learning outcomes.

Citation and attribution criteria:

Any use of AI tools should be explicitly stated in the submitted paper (e.g., in a footnote or appendix).

The name of the tool, the purpose of use (e.g., grammar check, organization of ideas, writing example), and where in the paper it was used should be stated.

Responsible use of AI will be evaluated as part of the criteria for originality and academic honesty. In this sense, in this course, AI can be used exclusively for translations of text in another language, writing improvement or creation of images/figures. AI should never be used as the main source of text generation.

Types of evaluation:

There are two types of assessment, ordinary (40% minimum attendance) and single assessment (alternative). The single evaluation is an exceptional evaluation for those students who for accredited and justified reasons cannot meet the minimum attendance criteria. This option must be requested by the student to the teacher of the subject in writing and he/she will receive a response to his/her request in the same way.

The alternative evaluation will consist of a theoretical exam (50%) and a practical exam (50%). Both exams must be passed in order to average and pass the course.

Online teaching

Assessed learning outcomes	Granted percentage	Assessment method
R2, R3, R4, R5, R6, R7	70,00%	Final evaluation consisting of essay questions and hypothetical scenarios.
R2, R5, R6	5,00%	Submitted tasks
	0,00%	Periodical assessment through questionnaires
R1, R2, R3, R4, R5, R6, R7	25,00%	Attendance and participation in synchronic communication activities.

Observations

Notes:

The written exam will consist of a theoretical and a practical part. The form provided by the teacher and a calculator with statistical functions will be used for this exam.

In order to pass the course the student must pass the different evaluation systems (written exam, attendance and active participation and deliverable assignments) separately.

Criteria for the awarding of honors:

Obtain 9.0 points or higher and evidence levels of excellence in all competencies and learning outcomes.

Citation and attribution criteria:

Any use of AI tools should be explicitly stated in the submitted paper (e.g., in a footnote or appendix).

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, competency analysis, explanation and demonstration of capacities, abilities and knowledge in the classroom (presential modality).
- M2 Teacher-supervised groupwork sessions: case studies, diagnostic tests, problems, fieldwork, IT room, visits, data searches, libraries, web, Internet, etc. Building knowledge significantly through interaction and student activities (presential modality).
- M3 Supervised monographic sessions with shared participation.
- M4 Application of interdisciplinary knowledge.
- M6 Personalized attention in small groups. Training and/or orientation period by a teacher aimed at revising and discussing the materials and topics presented in the lessons, seminars, lectures, assignments, etc.
- M7 Set of oral and/or written tests employed in initial, training or summative assessment of the student.
- M8 Group preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be presented or handed in during theory lessons, practical lessons and/or tutoring sessions in small groups. Tasks done on the platform or other virtual spaces.

- M9 Students' independent study: individual preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be presented or handed in during theory lessons, practical lessons and /or small-group tutoring sessions. Tasks on the platform or other virtual spaces.
- M11 Teacher presentation of contents, competencies analysis, explanation and demonstration of capacities, abilities and knowledge on the virtual classroom.
- M12 Group work sessions via chat moderated by the teacher. Case studies –both real and fictional– aimed at building knowledge through interaction and students' activities. Critical analysis of values and social commitment.
- M13 Monographic sessions throughout the course, focused on current aspects and applications of the subject.
- M14 Set of oral and/or written tests employed in initial, training or summative assessment of the student.
- M15 Student's individual study: individual preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be discussed or turned in in electronic format.
- M16 Individualized attention for the monitoring and orientation in the learning process, performed by a tutor in order to revise and discuss the materials and topics, seminars, readings and assignments, etc.
- M17 Group preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be discussed or handed in.
- M18 Participation and contributions to discussion forums related to the subject and moderated by the module's teacher.
- M19 Problem resolution, comments, reports to be handed in according to the deadlines throughout the course.

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
I	Introduction to psychological measurement
II	Test theory
III	Metric quality assessment
IV	Assignment, transformation and matching of scores
V	Techniques for the construction of a test
VI	Adaptation of tests for use in other languages

Temporary organization of learning:

Block of content	Number of sessions	Hours
I	3,00	6,00
II	2,00	4,00
III	17,00	34,00
IV	5,00	10,00
V	2,00	4,00
VI	1,00	2,00
