## Assessment system for the acquisition of competencies and grading system

### In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1	60,00%	Oral and/or written tests employed in initial, training and/or summative student assessment.
R2, R3	10,00%	Presentation of practical activities.
R1	10,00%	Attendance and active participation: lessons, group assignments and tutoring sessions. It will be monitored and registered by the teacher.
R2, R3	20,00%	Group assignments.

### Observations

#### CRITERIA FOR AWARDING HONORS DISTINCTION (MATRÍCULA DE HONOR):

The highest results starting from a final grade of 9.5, along with demonstrated excellence in practical activities, as well as active attendance and participation in class.

According to general regulations, only one honors distinction may be awarded per 20 students—not per fraction of 20—with the exception of groups with fewer than 20 students in total, in which one honors distinction may still be granted.

#### USE OF AI:

The responsible use of AI will be evaluated in submissions as part of the criteria for originality and academic honesty. Any use of AI tools must be explicitly stated in the submitted document (for example, in a footnote or appendix). The name of the tool, the purpose of its use (e.g., grammar checking, idea organization, writing example), and the specific part of the work where it was used must be indicated.

#### OTHER RELEVANT ASSESSMENT INFORMATION:

The final evaluation for the course will consist of a written exam combining multiple-choice questions and short-answer questions. The multiple-choice questions will assess factual knowledge and understanding of fundamental theoretical concepts, while the short-answer questions will evaluate students' ability to express their knowledge in writing and apply these concepts to practical situations.

To pass the course, students must pass each component of the evaluation separately (attendance and active participation, assignments, and written exams). Regarding attendance and participation, students must attend at least 40% of the instructional sessions.

#### SINGLE ASSESSMENT OPTION:

The single assessment is an exceptional evaluation method for students who, for accredited and justified reasons, cannot meet the minimum attendance requirement for instructional sessions (<40%). This option must be requested in writing by the student to the course instructor, along with documentation supporting the circumstances preventing them from meeting the attendance requirement. This evaluation will consist of:

- Completion of a written test including multiple-choice questions, essay-style responses, and practical case studies.
- Submission of all mandatory assignments.
- As in the standard evaluation process, to pass the course the student must pass each evaluation component separately, with the exception of attendance.

### Online teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1	75,00%	Final evaluation consisting of essay questions and hypothetical scenarios.
R2, R3	5,00%	Submitted tasks
	0,00%	Periodical assessment through questionnaires
R1	20,00%	Attendance and participation in synchronic communication activities.

### Observations

#### CRITERIA TO AWARD THE MENTION OF DISTINCTION:

Better results from 9.5 in the final grade, and show levels of excellence in practical activities, as well as in attendance and active participation in class.

According to the general normative, only one Distinction may be granted to a student in a course of 20 students, not on the grounds of a fraction of 20, unless the number of students enrolled is under 20 in which case only one Distinction may be granted.

#### OTHER RELEVANT ASPECTS ABOUT ASSESSMENT:

The final evaluation for the course will consist of a written exam that combines multiple-choice questions and short-answer questions. The multiple-choice questions will assess factual knowledge and understanding of fundamental theoretical concepts, while the short-answer questions will evaluate the students' ability to articulate their knowledge in writing and apply these concepts to practical situations.

In order to pass the course, the student must pass the different evaluation systems separately (attendance and active participation, group work and written tests).

#### USE OF AI:

The responsible use of AI will be evaluated in submissions as part of the criteria for originality and academic honesty. Any use of AI tools must be explicitly stated in the submitted document (for example, in a footnote or appendix). The name of the tool, the purpose of its use (e.g., grammar

checking, idea organization, writing example), and the specific part of the work where it was used must be indicated.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

## Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, competency analysis, explanation and demonstration of capacities, abilities and knowledge in the classroom (presential modality).
- M2 Teacher-supervised groupwork sessions: case studies, diagnostic tests, problems, fieldwork, IT room, visits, data searches, libraries, web, Internet, etc. Building knowledge significantly through interaction and student activities (presential modality).
- M3 Supervised monographic sessions with shared participation.
- M4 Application of interdisciplinary knowledge.
- M6 Personalized attention in small groups. Training and/or orientation period by a teacher aimed at revising and discussing the materials and topics presented in the lessons, seminars, lectures, assignments, etc.
- M7 Set of oral and/or written tests employed in initial, training or summative assessment of the student.

- M8 Group preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be presented or handed in during theory lessons, practical lessons and/or tutoring sessions in small groups. Tasks done on the platform or other virtual spaces.
- M9 Students' independent study: individual preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be presented or handed in during theory lessons, practical lessons and /or small-group tutoring sessions. Tasks on the platform or other virtual spaces.
- M11 Teacher presentation of contents, competencies analysis, explanation and demonstration of capacities, abilities and knowledge on the virtual classroom.
- M12 Group work sessions via chat moderated by the teacher. Case studies –both real and fictional– aimed at building knowledge through interaction and students' activities. Critical analysis of values and social commitment.
- M13 Monographic sessions throughout the course, focused on current aspects and applications of the subject.
- M14 Set of oral and/or written tests employed in initial, training or summative assessment of the student.
- M15 Student's individual study: individual preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be discussed or turned in in electronic format.
- M16 Individualized attention for the monitoring and orientation in the learning process, performed by a tutor in order to revise and discuss the materials and topics, seminars, readings and assignments, etc.
- M17 Group preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be discussed or handed in.
- M18 Participation and contributions to discussion forums related to the subject and moderated by the module's teacher.
- M19 Problem resolution, comments, reports to be handed in according to the deadlines throughout the course.
