Assessment system for the acquisition of competencies and grading system

In-class teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	60,00%	Oral and/or written tests employed in initial, training and/or summative student assessment.
R2, R3, R4	10,00%	Presentation of practical activities.
R1, R2, R3, R4	20,00%	Attendance and active participation: lessons, group assignments and tutoring sessions. It will be monitored and registered by the teacher.
R2, R3, R4	10,00%	Oral presentation of assignments.

Observations

CONTINUOUS EVALUATION

It is the usual form of evaluation, to pass the course the student must pass separately the different evaluation systems (attendance and active participation, exam and practices).

It is considered that in order to acquire the competences of the subject and to be entitled to a continuous evaluation, the student must have more than 40% of attendance.

The written test will be a multiple choice exam.

SINGLE EVALUATION

The single evaluation is an exceptional option for those students who, for accredited and justified reasons, cannot meet the minimum attendance requirement. In this case, the student must request it in writing to the professor of the subject and wait for a response to his request.

The evaluation system will be as follows:

-Multiple choice written test.60%.

Submission and presentation of practical work.20% -Oral presentation of a practical work.20%

-Oral presentation of a practical work.20% -Oral presentation of a practical work.

Oral presentation of a paper chosen by the professor .20% -Oral presentation of a paper chosen by the professor .20% -Oral presentation of a paper chosen by the professor .20%.

CITATION AND ATTRIBUTION CRITERIA

Any use of AI tools must be explicitly stated in the submitted paper (e.g., in a footnote or attachment). The name of the tool:

- The name of the tool
- The purpose of use (e.g. grammar check, organization of ideas, writing example)
- The specific parts where it has been used

Responsible use of AI will be assessed as part of the criteria for originality and academic honesty .

CRITERIA FOR THE AWARDING OF HONORS

Evidence of excellence in all competencies and learning outcomes, with a grade higher than 9.5.

Online teaching

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	70,00%	Final evaluation consisting of essay questions and hypothetical scenarios.
R1, R2, R3, R4	5,00%	Submitted tasks
R1, R2, R3, R4	25,00%	Attendance and participation in synchronic communication activities.

Observations

In order to pass the course, the student must pass each of the different evaluation systems separately.

The performance test on the level of theoretical knowledge acquired by the student will take the form of a multiple-choice exam.

CITATION AND ATTRIBUTION CRITERIA

Any use of AI tools must be explicitly stated in the submitted paper (e.g., in a footnote or attachment). The name of the tool:

- The name of the tool
- The purpose of use (e.g. grammar check, organization of ideas, writing example)
- The specific parts where it has been used

Responsible use of AI will be assessed as part of the criteria for originality and academic honesty .

CRITERIA FOR THE AWARDING OF HONORS

Evidence of excellence in all competencies and learning outcomes, with a grade higher than 9.5.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 Teacher presentation of contents, competency analysis, explanation and demonstration of capacities, abilities and knowledge in the classroom (presential modality).
- M2 Teacher-supervised groupwork sessions: case studies, diagnostic tests, problems, fieldwork, IT room, visits, data searches, libraries, web, Internet, etc. Building knowledge significantly through interaction and student activities (presential modality).
- M3 Supervised monographic sessions with shared participation.
- M4 Application of interdisciplinary knowledge.
- M6 Personalized attention in small groups. Training and/or orientation period by a teacher aimed at revising and discussing the materials and topics presented in the lessons, seminars, lectures, assignments, etc.
- M7 Set of oral and/or written tests employed in initial, training or summative assessment of the student.
- M8 Group preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be presented or handed in during theory lessons, practical lessons and/or tutoring sessions in small groups. Tasks done on the platform or other virtual spaces.
- M9 Students' independent study: individual preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be presented or handed in during theory lessons, practical lessons and /or small-group tutoring sessions. Tasks on the platform or other virtual spaces.
- M11 Teacher presentation of contents, competencies analysis, explanation and demonstration of capacities, abilities and knowledge on the virtual classroom.
- M12 Group work sessions via chat moderated by the teacher. Case studies –both real and fictional– aimed at building knowledge through interaction and students' activities. Critical analysis of values and social commitment.
- M13 Monographic sessions throughout the course, focused on current aspects and applications of the subject.

- M14 Set of oral and/or written tests employed in initial, training or summative assessment of the student.
- M15 Student's individual study: individual preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be discussed or turned in in electronic format.
- M16 Individualized attention for the monitoring and orientation in the learning process, performed by a tutor in order to revise and discuss the materials and topics, seminars, readings and assignments, etc.
- M17 Group preparation of readings, essays, problem resolution, seminars, assignments, reports, etc. to be discussed or handed in.
- M18 Participation and contributions to discussion forums related to the subject and moderated by the module's teacher.
- M19 Problem resolution, comments, reports to be handed in according to the deadlines throughout the course.
