

Information about the subject

Degree: Bachelor of Science Degree in Occupational Therapy

Faculty: Faculty of Psychology

Code: 1122002 **Name:** Medical-surgical conditions I

Credits: 6,00 **ECTS Year:** 2 **Semester:** 1

Module: MEDICAL, SURGICAL AND PSYCHIATRIC AFFECTIONS

Subject Matter: Medical-Surgical Conditions **Type:** Compulsory

Field of knowledge: Health Sciences

Department: -

Type of learning: Classroom-based learning

Languages in which it is taught: Spanish

Lecturer/-s:

1122	<u>Marta Pilar Gutierrez Delgado</u> (Responsible Lecturer)	marta.gutierrez@ucv.es
	<u>Maria Teresa Alcayde Blat</u>	mt.alcayde@ucv.es

Module organization

MEDICAL, SURGICAL AND PSYCHIATRIC AFFECTIONS

Subject Matter	ECTS	Subject	ECTS	Year/semester
Medical-Surgical Conditions	18,00	Medical-surgical conditions I	6,00	2/1
		Medical-surgical conditions II	6,00	2/2
		Medical-surgical conditions III	6,00	3/1
Psychiatry	6,00	Psychopathology and psychological treatments	6,00	3/1
Public Health	6,00	Public health, management and quality of care	6,00	4/2

Recommended knowledge

Not required. It is recommended to have previously studied the Subjects: Structure and Function of the Human Body I and II.

Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 To know the main medical-surgical conditions on which the Occupational Therapist intervenes.
- R2 To know and properly use subject-specific terminology.
- R3 To use, interpret and critically evaluate scientific documents used in the study of medical-surgical conditions.
- R4 To acquire the ability to synthesize and explain basic concepts.

Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

GENERAL		Weighting			
		1	2	3	4
CG2	To know the national and international health organisations, as well as the environments and conditions of the different health systems		X		
CG3	To obtain and use epidemiological data and value trends and risks involved in the taking of health-related decisions			X	
CG9	To recognise the determiners of health on the population, the resources and multidisciplinary teams and the intervention actions, maintenance and promotion of health, at an individual level as well as that of community		X		
CG14	To know, select and apply the appropriate theories, the theoretical frameworks for reference, the models and methods of Occupational Therapy practice to choose or re-establish meaningful occupation, according to the health needs of individuals/populations (promotion of health, prevention and treatment).			X	
CG15	To cooperate with groups and communities to promote the health and wellbeing of their members through participation in meaningful occupation			X	
CG19	To acquire basic knowledge about management and improvement of the quality of Occupational Therapy services considering the advances in health, social care, society and legislation at local, national and international levels, centred on individuals/populations		X		
CG21	To listen actively, to obtain and summarise key information about occupational problems and demands of the individuals/populations and to understand the content of that information.			X	
CG22	To establish an assertive interpersonal communication with all the interlocutors that is relevant during the Occupational Therapy process.		X		

SPECIFIC	Weighting			
	1	2	3	4
CE59 To know and understand medical, surgical and psychiatric knowledge applicable to the human being in all stages of the cycle of life, from infancy to old age, that allow the students to evaluate, synthesise and apply Occupational Therapy treatments.			X	
CE60 To know and understand the physio-pathological process at every stage of the life cycle, identifying the problems and preventive and clinical aspects of the person, in health as well as in illness.			X	
CE61 To know, evaluate, analyse, elaborate and participate in educational programmes and promote health within the scope of Occupational Therapy in order to prevent occupational dysfunctions in general and subsequent to medical, surgical and psychiatric conditions, as well as social exclusion.				X
CE62 To synthesise and apply the relevant knowledge of biological, medical, human, pedagogical, psychological, social, technological and occupational sciences, together with the theories of occupation and participation.				X

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	50,00%	Written tests: Summative and final theoretical-practical test (open questions, objective test questions, truncated test, etc.) Preparation of field work memoranda, practical case solutions, single cases.
R2, R3, R4	30,00%	Presentation of group and individual works.
R1, R2, R3, R4	20,00%	Individual monitoring of attendance at face-to-face sessions and active participation in theoretical and practical classes, seminars and tutorials.

Observations

To add the percentages it is essential to approve each and every one of the evaluation instruments. Failure to comply with the rules and deadlines established for carrying out academic activities will invalidate the final grade.

Criteria for granting a grade of A with honors ("Matrícula de Honor"): Highest rating in the areas evaluated. Mention honors will be awarded to students who have obtained a score equal to or greater than 9.0. Their number must not exceed 5% of students enrolled in a relevant subject in the academic year unless the enrollment is below 20, in which case one may be granted honors. (Real Decreto 1125/2003).

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 ON-CAMPUS CLASS
- M2 PRACTICAL CLASSES
- M3 SEMINAR
- M4 GROUP PRESENTATION OF PAPERS
- M5 OFFICE ASSISTANCE
- M6 ASSESSMENT
- M7 GROUP WORK
- M8 INDEPENDENT WORK

IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
ON-CAMPUS CLASS: Teacher presentation of contents, analysis of competences, explanation and in-class display of skills, abilities and knowledge. M1	R1, R2, R3	29,00	1,16
PRACTICAL CLASSES: Group work sessions supervised by the professor. Case studies, diagnostic tests, problems, field work, computer room, visits, data search, libraries, on-line, Internet, etc. Meaningful construction of knowledge through interaction and student activity. M2	R1, R2, R3, R4	10,00	0,40
SEMINAR: Supervised monographic sessions with shared participation M3	R1, R3	7,50	0,30
GROUP PRESENTATION OF PAPERS: Application of multidisciplinary knowledge M4	R2, R3, R4	7,50	0,30
OFFICE ASSISTANCE: Personalized and small group attention. Period of instruction and /or orientation carried out by a tutor to review and discuss materials and topics presented in classes, seminars, eadings, papers, etc. M5	R1, R2, R3, R4	3,00	0,12
ASSESSMENT: Set of oral and/or written tests used in initial, formative or additive assessment of the student M6	R1, R2, R3, R4	3,00	0,12
TOTAL		60,00	2,40

LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
<p>GROUP WORK: Group preparation of readings, essays, problem solving, seminars, papers, reports, etc. to be presented or submitted in theoretical lectures, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)</p> <p>M7</p>	R3, R4	40,00	1,60
<p>INDEPENDENT WORK: Student study: Group Individual preparation of readings, essays, problem solving, seminars, papers, reports, etc. to be presented or submitted in theoretical lectures, practical and/or small-group tutoring sessions. Work done on the university e-learning platform (www.plataforma.ucv.es)</p> <p>M8</p>	R1, R2, R3, R4	50,00	2,00
TOTAL		90,00	3,60

Description of the contents

Description of the necessary contents to acquire the learning outcomes.

Theoretical contents:

Content block	Contents
HEALTH PROBLEMS IN CHILDHOOD INTEREST FOR OCCUPATIONAL THERAPIST: DISEASES OF CHILDREN AND ADOLESCENTS	<ol style="list-style-type: none">1 .- The child healthy and pathological growth2 .- Prenatal Pathology.3 .- Delay and / or immaturity psychomotor4 .- Delay and / or immaturity psychomotor II5.- Delay and / or immaturity psychomotor III6 .- Sensory disturbances7 .- Neuromuscular dystrophies8 .- Disorders of movement and control9 .- Orthopedic diseases and treatments10 .- Brain Damage11 .- Miscellaneous12.- Applied occupational therapy

MUSCULOSKELETAL PATHOLOGY

Introduction

1. Semiology of the musculoskeletal system. Major signs and symptoms. Key diagnostic tests. Basic maneuvers exploration.
2. Main manifestations of osteoarticular pathology. Fractures, sprains, dislocations
3. Fracture repair. Callus formation. Delayed union and nonunion. Complications: Fat embolism. Pressure ulcers. Osteomyelitis. Paraarticular ossification. Compartment syndromes. Vascular changes.

GENERAL PATHOLOGY

4. Osteoarthritis. Concept and pathogenesis. Management of patients with osteoarthritis.
5. Amputees. Prosthesis.
6. Burned
7. Osteoporosis. Definition, impact and control of the osteoporotic patient.

TRAUMATIC AND RHEUMATIC DISEASES

8. Upper extremity
9. Shoulder pathology. Principal tables traumatic, orthopedic, neurological and rheumatic
10. Pathology of the elbow. Main clinical
11. Pathology of the hand. Principal tables traumatic, orthopedic, neurological and rheumatic.
12. Rheumatic diseases I. Rheumatoid arthritis.
13. Rheumatic diseases II. Ankylosing spondylitis.
14. Rheumatic diseases III. Gout and pseudogout. Fibromyalgia. Lupus erythematosus, dermatomyositis and scleroderma.
15. Spine pathology: Fractures. Cervical pain, lumbago, sciatica.
16. Spine deformities
17. Hip pathology. Hip fractures. Prosthesis. Management of elderly patients with hip prosthesis.
18. Pathology of the knee. Principal tables traumatic, orthopedic, neurological and rheumatic.
19. Foot pathology. Principal tables traumatic, orthopedic, neurological and rheumatic, orthopedic muscle and tendon rupture, nerve sections.

Temporary organization of learning:

Block of content	Number of sessions	Hours
HEALTH PROBLEMS IN CHILDHOOD INTEREST FOR OCCUPATIONAL THERAPIST: DISEASES OF CHILDREN AND ADOLESCENTS	15,00	30,00
MUSCULOSKELETAL PATHOLOGY	15,00	30,00
