

## Information about the subject

**Degree:** Bachelor of Science Degree in Veterinary Medicine

**Faculty:** Faculty of Veterinary Medicine and Experimental Sciences

**Code:** 1260108 **Name:** Animal Domestication (Ethnology, Ethology and Animal Welfare)

**Credits:** 6,00 **ECTS Year:** 1 **Semester:** 2

**Module:** Module of Common Basic Training

**Subject Matter:** Animal Domestication **Type:** Compulsory

**Department:** Animal Production and Public Health

**Type of learning:** Classroom-based learning

**Languages in which it is taught:** Spanish

### Lecturer/-s:

1261A	<u>Clara Llamazares Martin</u> ( <b>Responsible Lecturer</b> )	clara.llamazares@ucv.es
	<u>Antonio Calvo Capilla</u>	antonio.calvo@ucv.es
	<u>Joel Bueso Rodenas</u>	joel.bueso@ucv.es
	<u>Ramiro Soler Castillo</u>	ramiro.soler@ucv.es
	<u>Xavier Valldecabres Torres</u>	xavier.valldecabres@ucv.es
1261B	<u>Clara Llamazares Martin</u> ( <b>Responsible Lecturer</b> )	clara.llamazares@ucv.es
	<u>Antonio Calvo Capilla</u>	antonio.calvo@ucv.es

1261B Joel Bueso Rodenas

joel.bueso@ucv.es

Ramiro Soler Castillo

ramiro.soler@ucv.es

Xavier Valdecabres Torres

## Module organization

### Module of Common Basic Training

Subject Matter	ECTS	Subject	ECTS	Year/semester
Statistics	6,00	Biometrics and Statistics	6,00	1/1
Biology	6,00	Animal and Plant Biology	6,00	1/1
Biochemistry	6,00	Biochemistry	6,00	1/2
Animal Anatomy	18,00	Animal Anatomy I and Embryology	6,00	1/1
		Animal Anatomy II	6,00	1/2
		Animal Cytology and Histology	6,00	1/2
Animal Physiology	12,00	Animal Physiology I	6,00	2/1
		Animal Physiology II and Immunology	6,00	2/2
Genetics	6,00	Genetics	6,00	1/2
Animal Domestication	6,00	Animal Domestication (Ethnology, Ethology and Animal Welfare)	6,00	1/2
Biological Agents of Interest in Veterinary Medicine	12,00	Veterinary Microbiology	6,00	2/2
		Veterinary Parasitology	6,00	2/1
Veterinary Medicine and Society	6,00	Veterinary Regulations and Legislation, Social Morality and Professional Deontology	6,00	5/1

Physics and Chemistry	6,00	Physico-chemical fundamentals of veterinary medicine	6,00	1/1
-----------------------	------	--	------	-----

## Recommended knowledge

Not required

## Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 The student knows and differentiates the breeds of domestic animals according to their taxonomic system, morphological, phaneroptic and productive aspects.
- R2 The student knows and is able to evaluate the main behavioural traits of domestic animals.
- R3 The student knows the concept and importance of animal welfare and the methodologies for assessing it, as well as the possible welfare problems presented by the animals.
- R4 The student extracts qualitative information on aspects of ethnology, ethology and animal welfare.
- R5 The student searches bibliographic information from different sources and knows how to analyse it with a critical and constructive spirit.
- R6 The student is able to analyse and evaluate different behavioural alterations of domestic animals.
- R7 The student argues according to rational criteria based on his or her work.
- R8 The student is able to write a comprehensible and organized text on various aspects of animal domestication.

## Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC		Weighting			
		1	2	3	4
CB1	Students must show that they have and understand knowledge in a field of study that is based on general secondary education on a level that, although supported by advanced text books, includes also some aspects that involve knowledge belonging to the vanguard of their field of study.			X	
CB3	Capacity to gather and interpret relevant data usually within their specific field of study and capacity to make judgments that include reflection on relevant social, scientific or ethical issues.			X	

GENERAL		Weighting			
		1	2	3	4
CG0	Capacity to speak well in public.			X	
CG3	Understanding and applying control of animal breeding, management, health, reproduction, protection, and feed as well as improving production.		X		
CG5	Understanding and applying laws, regulations and administrative provisions in all areas of the veterinary profession and public health, understanding the ethical implications of health in a changing global context.			X	
CG6	Developing professional practice, acquiring skills related to teamwork, with an efficient use of resources and quality management.		X		
CG7	Identifying emerging risks in all areas of the veterinary profession.			X	

SPECIFIC		Weighting			
		1	2	3	4
E13	Knowing and applying principles and bases of the ethnic characteristics of production, with special reference to management.				X
E14	Knowing and applying principles and bases of animal behavior and the process of domestication.				X
E19	Knowing and applying principles and foundations of animal welfare and protection.				X

  

TRANSVERSAL		Weighting			
		1	2	3	4
T1	Capacity of analysis, synthesis, implementation of knowledge for problem-solving and decision-making.			X	
T4	Mastering fluency in oral and written mother tongue communication, listening and responding effectively using a language appropriate to audience and context.				X
T6	Using information technology to communicate, share, search for, collect, analyze and manage information, especially related to the veterinarian practice.				X
T8	Efficient and effective work, both independently and as a member of a multidisciplinary team or unit, showing respect, appreciation and sensitivity to the work of others.			X	
T10	Ability to learn, to research, and to be aware of the need to keep knowledge updated, and attending training programs.			X	

## Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R6, R8	60,00%	Written assessment of acquired knowledge and skills. The test may consist of a series of open-ended questions or multiple-choice questions about the theoretical contents of the module and/or practical exercises (problem-solving).
R1, R2, R3, R4, R5, R6, R7, R8	20,00%	Evaluation of the use of the practical lessons in the classroom, of problems or computer science, seminars and tutorials, by means of participation, computer-supported problem solving and the elaboration of the corresponding reports.
R1, R2, R3, R4, R5, R6, R8	10,00%	Evaluation of group work through a system of continuous assessment throughout the course based on the delivery of assignments the objectives and content of which will be proposed by the teacher.
R1, R2, R3, R6	10,00%	Evaluation of activities in which the student must do some research individually and structure information related to each of the topics through a system of continuous assessment throughout the course based on the delivery of papers, the objectives and contents of which will be proposed by the teacher.

### Observations

All students must obtain a minimum score of 5 in the first part final exam, identification of animal breeds, to pass the subject. Attendance to practical sessions is compulsory. Those students who, for a justified reason (see article 10 of the regulations in force <https://www.ucv.es/documentos/normativa/documento11.html>), cannot attend the evaluation of the course on the official exam date, may undergo the final evaluation of the course by means of an oral or written examination according to the teacher's criteria. In all the written evaluations that are carried out in the course spelling will be taken into account, so that for each spelling mistake (including accents) 0.1 points will be subtracted from the final grade up to a maximum of 2 points.

## MENTION OF DISTINCTION:

According to Article 22 of the Regulations governing the Evaluation and Qualification of UCV Courses, the mention of "Distinction of Honor" may be awarded by the professor responsible for the course to students who have obtained, at least, the qualification of 9 over 10 ("Sobresaliente"). The number of "Distinction of Honor" mentions that may be awarded may not exceed five percent of the number of students included in the same official record, unless this number is lower than 20, in which case only one "Distinction of Honor" may be awarded.

## Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- M1 On-site training activity aimed primarily at acquiring knowledge acquisition skills. It is characterised by the fact that students are spoken to. Also called master class or exposition, it refers to the oral presentation made by the teacher, (with the support of blackboard, a computer and a projector for the display of texts, graphs, etc.), in front of a group of students. They are expository, explanatory or demonstrative sessions of contents. The size of the group is determined by the limit or physical capacity of the classroom; therefore, it is a single group.
- M2 On-site training activity aimed primarily at obtaining knowledge application and research skills. Knowledge is built through interaction and activities. The activity consists of supervised monographic sessions with shared participation (teachers, students, experts). The size of the group is variable, from one large group to various small groups, with a minimum of 6 students to ensure interaction. The evaluation will be based on follow-up records kept by the teacher. Participation and the development of the capacity to problematize should be taken into account.
- M4 On-site training activity in groups that takes place in the classroom. It includes working with documents and formulating ideas without handling animals, organs, objects, products, or corpses (e.g., work with articles or documents, clinical case studies, diagnostic analyses, etc.). It would correspond to "Animal-free supervised practical work", type e1, from the European evaluation of EAEVE. The size of the group is variable, in a range of 10 to 20 students.
- M5 On-site training activity in groups that takes place in the Computer Lab where the computer is used as support for learning. It includes work with computer models, specific software, Web queries, etc. It would correspond to "Animal-free supervised practical work", type e1, from the European evaluation of EAEVE. The size of the group is variable, in a range of 10 to 20 students.

- M8 A set of on-site training activities carried out by the teacher to provide personalised attention to the student or in small groups with the aim of reviewing and discussing the materials and topics presented in classes, seminars, readings, carrying out projects, etc. The aim is to ensure a truly comprehensive education of the student rather than a mere transfer of information. It is, therefore, a personalized assistance relationship in which the tutor assists, facilitates and guides one or more students in the learning process.
- M9 Set of processes that attempt to evaluate the learning outcomes of students expressed in terms of acquired knowledge, capacities, skills or abilities developed and manifested attitudes. It covers a wide range of activities that can be developed for students to demonstrate their training (e.g. written, oral and practical tests, projects or assignments). It also includes the Official Calls.
- M10 Autonomous training activity, including activities and coursework, bibliographic searches. The results obtained from unsupervised group and teamwork will be evaluated, with particular attention paid at the time of evaluation to the acquisition of specific knowledge development skills through group work.
- M11 Autonomous training activities related to personal study, or the preparation of individual course assignments. The individual preparation of readings, essays, problem solving, papers, reports, etc. will be evaluated through presentations or submissions during theoretical classes, practical classes, seminars and/or tutorials. The evaluation of the submitted papers will consider the structure of the paper, the quality of the documentation, originality, spelling and presentation.

## IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
Theoretical lessons (TL) M1	R1, R2, R3	44,00	1,76
Seminars (S) M9	R3, R4, R5, R7, R8	2,00	0,08
Problem-solving Practice (PSP) M4	R2, R3, R6	4,00	0,16
In-Classroom Practice (ICP) M4	R1, R3	6,00	0,24
Tutorial M8	R1, R2, R3, R4, R6, R7	2,00	0,08
Evaluation (Ev) M9	R1, R2, R3, R4, R5, R6, R7, R8	2,00	0,08
<b>TOTAL</b>		<b>60,00</b>	<b>2,40</b>

## LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
Group work M10	R1, R2, R3, R4, R5, R6, R8	20,00	0,80
Individual work M11	R1, R2, R3, R4, R5, R8	70,00	2,80
<b>TOTAL</b>		<b>90,00</b>	<b>3,60</b>

## Description of the contents

Description of the necessary contents to acquire the learning outcomes.

### Theoretical contents:

Content block	Contents
ETHNOLOGY	<ol style="list-style-type: none"><li>1.Introduction to Ethnology: concept, breed classifications, classification systems, Baron's systematic classification, aloidism.</li><li>2.Equidae. Introduction. Saddle and jumping horses. Draught horses and ponies.Asses and equine hybrids.</li><li>3.Cattle, sheep and goats. Introduction. Main breeds according to origin and aptitude.</li><li>4.Porcine. Introduction. Foreign and Spanish porcine breeds.</li><li>5.Rabbits. Introduction. Breeds, hybrids and aptitudes.</li><li>6.Birds. Introduction. Hens. Aptitude. Hybrids. Companion and exotic birds.</li><li>7.Canines and felids. Introduction and classification.</li></ol>
ANIMAL WELFARE	<ol style="list-style-type: none"><li>1.Introduction to Animal Welfare. Assessment.</li><li>2.Animal welfare in cattle species.</li><li>3.Animal welfare in transport and slaughter.</li><li>4.Animal welfare in experimentation animals.</li><li>5.Animal welfare in pets.</li></ol>
ETHOLOGY	<ol style="list-style-type: none"><li>1.Ethology. Introduction and general concepts.</li><li>2.Cognition.</li><li>3.Learning.</li><li>4.Behaviour of horses.</li><li>5.Behaviour of dogs and cats .</li><li>6.Behaviour of domestic ruminants.</li><li>7.Behaviour of pigs.</li><li>8.Behaviour of hens.</li></ol>

## Organization of the practical activities:

	Content	Place	Hours
PR1.	Ethology	Lecture room	2,00
PR2.	Visit to FIGAN Zaragoza 2021.	Technical visit	4,00
PR3.	Animal welfare I	Lecture room	2,00
PR4.	Animal welfare II	Lecture room	2,00
PR5.	Introduction to zootechnical ethnology.	Farm	2,00
PR6.	Equids. Morphology.	Riding club	2,00

## Temporary organization of learning:

Block of content	Number of sessions	Hours
ETHNOLOGY	17,00	34,00
ANIMAL WELFARE	6,00	12,00
ETHOLOGY	7,00	14,00

## Addendum to the Course Guide of the Subject

Due to the exceptional situation caused by the health crisis of the COVID-19 and taking into account the security measures related to the development of the educational activity in the Higher Education Institution teaching area, the following changes have been made in the guide of the subject to ensure that Students achieve their learning outcomes of the Subject.

**Situation 1: Teaching without limited capacity** (when the number of enrolled students is lower than the allowed capacity in classroom, according to the security measures taken).

In this case, no changes are made in the guide of the subject.

**Situation 2: Teaching with limited capacity** (when the number of enrolled students is higher than the allowed capacity in classroom, according to the security measures taken).

In this case, the following changes are made:

### 1. Educational Activities of Onsite Work:

All the foreseen activities to be developed in the classroom as indicated in this field of the guide of the subject will be made through a simultaneous teaching method combining onsite teaching in the classroom and synchronous online teaching. Students will be able to attend classes onsite or to attend them online through the telematic tools provided by the university (videoconferences). In any case, students who attend classes onsite and who attend them by videoconference will rotate periodically.

In the particular case of this subject, these videoconferences will be made through:

☒ Microsoft Teams

☒ Kaltura

## **Situation 3: Confinement due to a new State of Alarm.**

In this case, the following changes are made:

### **1. Educational Activities of Onsite Work:**

All the foreseen activities to be developed in the classroom as indicated in this field of the guide of the subject, as well as the group and personalized tutoring, will be done with the telematic tools provided by the University, through:

☒ Microsoft Teams

☒ Kaltura

Explanation about the practical sessions:

## 2. System for Assessing the Acquisition of the competences and Assessment System

### ONSITE WORK

#### Regarding the Assessment Tools:

☒ The Assessment Tools will not be modified. If onsite assessment is not possible, it will be done online through the UCVnet Campus.

☐ The following changes will be made to adapt the subject's assessment to the online teaching.

Course guide		Adaptation	
Assessment tool	Allocated percentage	Description of the suggested changes	Platform to be used

The other Assessment Tools will not be modified with regards to what is indicated in the Course Guide.

#### Comments to the Assessment System:
