

## Information about the subject

**Degree:** Official Master's Degree in Comprehensive Care of People with an Intellectual Disability

**Faculty:** Faculty of Psychology

**Code:** 1570003 **Name:** Implementation of the Paradigm of Supports II

**Credits:** 6,00 **ECTS** **Year:** 1 **Semester:** 2

**Module:** APPLICATION OF THE SUPPORT PARADIGM

**Subject Matter:** Application of the support paradigm II **Type:** Compulsory

**Department:**

**Type of learning:** Blended

**Languages in which it is taught:** Spanish

**Lecturer/-s:**

DISCAP    Ivan Franco Castellano (Responsible Lecturer)

## Module organization

### APPLICATION OF THE SUPPORT PARADIGM

Subject Matter	ECTS	Subject	ECTS	Year/semester
Application of the support paradigm I	6,00	Implementation of the Paradigm of Supports I	6,00	1/2
Application of the support paradigm II	6,00	Implementation of the Paradigm of Supports II	6,00	1/2

## Learning outcomes

At the end of the course, the student must be able to prove that he/she has acquired the following learning outcomes:

- R1 Know the main scales of evaluation of intelligence of application in intellectual disability.
- R2 Students prove ability to use the main evaluation tools of adaptive behaviour, validated in the Spanish population.
- R3 Students know and practice the basic fundamentals to carry out programs in adaptive skills that improve the quality of life of the people assisted in residential, housing, occupational or family environments.
- R4 Students carry out good assistance practices related to the intervention in conceptual adaptive skills (language, writing, money management, self-direction), social and practical (a.v.d, instrumental, occupational and maintenance of healthy environments).

## Competencies

Depending on the learning outcomes, the competencies to which the subject contributes are (please score from 1 to 4, being 4 the highest score):

BASIC	Weighting			
	1	2	3	4
CB7 The ability to apply their acquired knowledge and problem-solving skills in new or unfamiliar environments within broader (or multidisciplinary) contexts related to their area of study.				X
CB8 The ability to integrate knowledge and deal with the complexity of making judgments based on information that, being incomplete or limited, includes reflections on the social and ethical responsibilities linked to the application of their knowledge and judgments.				X
GENERAL				Weighting
				1 2 3 4
CG1 Information management skills.				X
CG7 Oral and written communication skills.				X
CG10 Self-critical attitude, that is, assessing one's own performance by knowing one's own competences and limitations, putting possible frustrations in perspective, showing interest in the quality of one's own performance and developing systems that guarantee the quality of one's own services.				X
CG11 Analysis and synthesis skills.				X
CG12 The ability to maintain relationships with other professionals in order to compare and validate the action guidelines.				X
SPECIFIC				Weighting
				1 2 3 4

Year 2025/2026

1570003 - Implementation of the Paradigm of Supports II

CE23	Knowledge of augmentative communication systems applicable to individuals with ID with limitations regarding expressive and receptive language.	X
CE24	Know the systems of augmentative communication applicable in people with ID with limitations in expressive and receptive language.	X
CE25	Students apply guidelines for maintaining healthy environments.	X
CE26	The ability to establish family and community intervention mechanisms for the improvement of the health conditions of people with ID.	X
CE27	Students perform functional assessments of mobility and movement of people with ID with motor problems.	X
CE28	In-depth knowledge of the main support products related to the mobility and movement of people with ID and motor problems.	X
CE29	Know the different phases of the life cycle of the family with a child with ID.	X
CE30	The ability to assess family dynamics and identify the main stress and conflict factors.	X
CE31	Know in depth the main tools of community intervention from a social perspective in the field of ID.	X

TRANSVERSAL		Weighting			
		1	2	3	4
CT1	Information management skills.				X
CT5	The ability to adapt to new situations.				X
CT7	Oral and written communication skills.			X	
CT8	Concern for the development of individuals and communities.			X	

## Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2, R3, R4	40,00%	Carrying out objective tests
R1, R2, R3, R4	20,00%	Individual monitoring of attendance in face-to-face and practical sessions
R1, R2, R3, R4	10,00%	Individual monitoring of active participation in face-to-face and practical sessions
R1, R2, R3, R4	30,00%	Realization of individual theoretical-practical activities assessable

### Observations

#### EVALUATION CRITERIA

· In order to pass the course, the student must pass the different assessment systems separately (attendance and active participation, theoretical-practical activities and final objective test).

· The continuous assessment will be a compendium of evidence of practical participation in the teaching sessions, individual work as well as the presentation of the same, and the development of a final objective test.

#### CRITERIA FOR THE AWARDING OF HONOURS:

· The mention of honours may be awarded to students who have obtained a grade equal to or higher than 9.5 and demonstrate levels of excellence in practical activities, as well as in attendance and active participation in class. In accordance with the general regulations, only one honourable mention may be awarded for every 20 students, not per fraction of 20, with the exception of groups of less than 20 students in total, in which one honourable mention may be awarded.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

## Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- |    |  |
|----|--|
| M1 | M1 Presentation of content by teachers, analysis of competencies, explanation and demonstration of capacities, skills and knowledge in person or synchronously through videoconferences.   |
| M2 | M2 Group work sessions supervised by the teacher, case studies, diagnostic analysis, problems, field study, visits to resources, data search (libraries, online, Internet, etc.) Significant construction of knowledge through the interaction and activity of the student.          |
| M4 | M4 Study of the student -with / without support on the platform- that includes individual preparation of readings, reports, evaluations, problem solving, case analysis, programs, memories, etc. to expose or deliver in theoretical classes, practical classes and / or tutorials. |
| M8 | M8 Individual personalized attention during the training period and / or orientation carried out by a tutor in order to review and discuss the materials and topics presented in the sessions, seminars, readings, completion of work, etc.  |
| M9 | M9 Set of oral and / or written tests used in the initial, formative or summative evaluation of the student.   |

Year 2025/2026

1570003 - Implementation of the Paradigm of Supports II

### IN-CLASS LEARNING ACTIVITIES

	LEARNING OUTCOMES	HOURS	ECTS
CLASES PRESENCIALES M1	R1, R2, R3, R4	35,00	1,40
TUTORÍA INDIVIDUAL M8	R1, R2, R3	2,00	0,08
ACTIVIDADES DE EVALUACIÓN M9	R1, R2, R3, R4	3,00	0,12
<b>TOTAL</b>		<b>40,00</b>	<b>1,60</b>

### LEARNING ACTIVITIES OF AUTONOMOUS WORK

	LEARNING OUTCOMES	HOURS	ECTS
TRABAJO AUTONÓMO INDIVIDUAL (CON O SIN APOYO EN PLATAFORMA) M4	R1, R2, R3, R4	110,00	4,40
<b>TOTAL</b>		<b>110,00</b>	<b>4,40</b>

## Description of the contents

Description of the necessary contents to acquire the learning outcomes.

### Theoretical contents:

Content block	Contents
Unit 1.	<ul style="list-style-type: none"><li>·Conceptual Skills and Learning in Intellectual Disability</li><li>·Social skills</li><li>·Practical Skills</li></ul>
Unit 2.	<ul style="list-style-type: none"><li>·The family environment and strategies for accompanying families</li></ul>
Unit 3.	<ul style="list-style-type: none"><li>·Participation in the community Accessible Environments, Cognitive Accessibility and Easy Reading</li></ul>
Unit 4.	<ul style="list-style-type: none"><li>·Self-determination, self-management and self-representation</li></ul>

### Temporary organization of learning:

Block of content	Number of sessions	Hours
Unit 1.	5,00	10,00
Unit 2.	5,00	10,00
Unit 3.	5,00	10,00
Unit 4.	5,00	10,00
