X
CT12	The ability to maintain relationships with other professionals in order to compare and validate the action guidelines.			X	

Assessment system for the acquisition of competencies and grading system

Assessed learning outcomes	Granted percentage	Assessment method
R1, R2	70,00%	EXTERNAL INTERNSHIP TUTOR'S REPORT
R1, R2	30,00%	ASSESSMENT OF INTERNSHIP REPORTS

Observations

In the event that the student does not comply with the internship procedure foreseen in the Master's, he/she will be graded as a No Show.

CRITERIA TO AWARD THE MENTION OF DISTINCTION:

Better results from 9.5 in the final grade, and show levels of excellence in all competencies and learning outcomes.

According to the general normative, only one Distinction may be granted to a student in a course of 20 students, not on the grounds of a fraction of 20, unless the number of students enrolled is under 20 in which case only one Distinction may be granted.

OTHER RELEVANT ASPECTS ABOUT ASSESSMENT:

In order to pass the course, the student must pass the different evaluation systems separately (Report of the external internship tutor and Evaluation of the internship reports).

ETHICAL USE OF ARTIFICIAL INTELLIGENCE:

Citation and attribution criteria:

- All use of AI tools must be explicitly stated in the submitted document (for example, in a footnote or an appendix).
- The name of the tool, the purpose of use (e.g., grammar check, organization of ideas, writing sample), and the part of the work where it was used must be indicated.
- Responsible use of AI will be assessed as part of the criteria for originality and academic honesty.

Students may use AI for:

- Translation of texts into another language or improvement of writing and presentation of written documents.
- Searching for alternative resources and references for study.
- Any other activity agreed upon with the faculty.

Students may not use the AI to:

- Record or transcribe, in whole or in part, any classroom activity in order to obtain summaries or notes created by the AI.
- Present work generated by the AI as their own.

- Provide the AI with statements, exercises, or assessment tests to obtain automated responses.

In accordance with the regulations governing the assessment and grading of subjects in force at UCV, the distinction of "Matrícula de Honor" (Honours with Distinction) may be awarded to students who have achieved a grade of 9.0 or higher. The number of "Matrículas de Honor" (Honours with Distinction) may not exceed five percent of the students enrolled in the group for the corresponding academic year, unless the number of enrolled students is fewer than 20, in which case a single "Matrícula de Honor" (Honours with Distinction) may be awarded.

Exceptionally, these distinctions may be assigned globally across different groups of the same subject. Nevertheless, the total number of distinctions awarded will be the same as if they were assigned by group, but they may be distributed among all students based on a common criterion, regardless of the group to which they belong. The criteria for awarding "Matrícula de Honor" (Honours with Distinction) will be determined according to the guidelines stipulated by the professor responsible for the course, as detailed in the "Observations" section of the evaluation system in the course guide.

Learning activities

The following methodologies will be used so that the students can achieve the learning outcomes of the subject:

- | | |
|----|--|
| M5 | Application of interdisciplinary knowledge. |
| M8 | Group preparation of readings, case studies, seminars, papers, etc. to be presented or delivered in theory classes, practical classes or in small group tutorials. |
